

Summary of Math Adoption Committee Meeting 1

A committee has been formed that includes teachers, building administrators, community members, specialists, and the Director of Secondary Teaching & Learning/CTE, representing every region of the district.

The committee will engage in a two-year process to recommend resources for math courses from 6th grade through Algebra 2. The focus is on recommending math instructional materials that meet standards and support all learners.

Meeting Highlights:

- Discussed foundational research.
- Reviewed school board policy.
- Analyzed current pathways and materials.
- Compiled a preliminary list of interests that will be used to evaluate materials.

The next meeting is scheduled for December 5. The committee will continue to develop understanding of the math standards progression, consider effective practices that support the standards, and refine interests related to curricular materials.
