Local Procurement

NSLP Overview

The National School Lunch Program (NSLP) offers healthy alternatives to the common school lunch every day by ensuring that every student can follow NSLP rules and improve nutrition and wellness in their communities.

California Initiatives

California's procurement strategy is a key element of the state's commitment to local food systems and economic development.

NSLP Overview

The National School Lunch Program (NSLP) offers healthy, affordable, or free lunches to kids at school every day. By sourcing food locally, schools can follow NSLP rules and improve nutrition and sustainability in communities.

California Initiatives

California is encouraging schools to buy from local farmers. This improves meal quality, supports the local economy, and reduces transportation-related carbon emissions.

CDE Dishwasher Grant Awarded

The Colorado Department of Education (CDE) has awarded a grant to the University of Northern Iowa (UNI) to purchase a high-efficiency dishwasher for the UNI Center for the Study of the Family and the Community. The grant will cover the cost of the dishwasher and its installation.

Equipment Grant Application for New Ovens

As part of the process of applying for a grant to purchase new high-efficiency ovens, these students will be providing ongoing capabilities of being for a broader range of equipment that will be used by our students.

 Prezi

CDE Dishwasher Grant Awarded

The California Department of Education (CDE) has awarded BUSD a grant to acquire energy-efficient dishwashers (75K total). This investment will reduce water usage, improve sanitation standards, and streamline meal service operations for our students.

Equipment Grant Application for New Ovens

BUSD is in the process of applying for a grant to purchase new, high-efficiency ovens. These ovens will enhance cooking capabilities, allowing for a broader menu range and improved meal quality for our students.

New Menu Software

The implementation of new menu software allows BUSD Nutrition Services to streamline meal planning and inventory management. This digital solution supports efficient service delivery and enhances food selection variety.

Online Menus

With the introduction of online menus, parents and students can easily access meal options and daily specials. This transparency ensures informed choices and enhances satisfaction among the school community.

Menu updates

Nutritional Information

The new system provides comprehensive nutritional information for all menu items, ensuring compliance with health standards. Access to this data supports healthier choices, fostering better dietary habits among students.

Multilingual Support

The menu system accommodates 50 languages, promoting inclusivity and accessibility for diverse student populations. This feature fosters communication with non-English speaking families, ensuring everyone can understand meal options.

Menu Updates

Recent updates to the BUSD menu focus on nutritional balance and student preference. Incorporating feedback from surveys, the menu reflects healthier options while maintaining taste and appeal for student consumption.

Seasonal Choices

Seasonal menu choices are introduced to highlight fresh, locally sourced ingredients. These selections not only support local agriculture but also ensure meals are flavorful and align with students' nutritional needs throughout the school year.

Expansion Plans

BUSD plans to broaden its services to include more diverse meal options that cater to various dietary needs. This expansion will also focus on increasing the use of local produce through partnerships with regional farmers, aligning with the NSLP goals to promote nutrition and sustainability.

Community Engagement Strategies

To strengthen community ties, BUSD Nutrition Services will implement workshops that educate families about healthy eating. Engaging local stakeholders through feedback sessions will also inform future menu updates and ensure community needs are met.
