Dear Parents,

Beginning Monday, Dec. 2, each campus will have active security cameras at the front entryways. This new measure will add another layer of protection to ensure a secure learning environment.

Here's how the process works:

- When you arrive at the campus, press the doorbell button located at the main entrance to notify the office.
- Office staff will use the camera system to communicate with you and request to see your driver's license.
- Once your identity is verified, staff will remotely unlock the door to allow you inside.

This important enhancement, along with the installation of force-resistant window film at each campus, has been made possible thanks to nearly \$3 million in state safety grants awarded to Willis ISD this year. These funds, provided by the Texas Education Agency, are specifically designated for projects that bring campuses into compliance with the state's updated school safety standards.

We appreciate your understanding and cooperation as we implement these measures, and we thank you for your continued support in making our schools safe and secure for every Wildkat.
