#### CHOATE WELCOMES FAMILIES FOR FAMILY WEEKEND

By Eliana Li '26

Copy Editor

On October 24-26, the School hosted its annual Family Weekend, giving students' family members a sneak peek into life on campus. From class visits and parent-teacher conferences to activities like family bingo and an ice cream social, campus was packed with opportunities for families to connect and learn more about the Choate community.

Led by Parent and Community Relations Manager Ms. Cheryl Madden, the planning for Family Weekend involved various departments and took many months of preparation. "From the very beginning, we partner with [Director of Studies] Ms. Ellen Devine, who is integral in building the parent-teacher conference schedule and special schedule for the week. Once that schedule can be penciled in. I connect with each department to coordinate events, but they each take the reins on their respective parts of the weekend," Ms. Madden said.

included family members attending students' classes and new events that gave a wider glimpse into life at Choate. New additions included family bingo, School Meeting for parents, a visit er Ms. Nicole Hagar, lawn games, I've become a leader on campus." and the introduction of the "Taste of the Town" program.

Le'ah Griggs added, "[These con- being in was nice," she said. ferences] are important for parents to have a good rapport with formers could also showcase their

Many parents reflected on Family Weekend with gratitude. Bowles's parents, Dr. Claire Bowles P'25 and Mr. Jesse Bowles P'25, said, "We really appreciated seeing [our daughter] 'in her element.' It gave us the chance to understand what sending her to Choate really means. We were really impressed to see that it has all paid off." Chief Communications Officer Ms. Alison Cady, parent of Annie Cady '26, also described the weekend as rewarding. "I enjoyed the opportunity to visit classes and attend activities with my daughter. It honestly reinforced the value of a lot of the work we do the rest of the year," she said.

# 2024 PHILLIPS SPEAKER SPOTLIGHTS THE POWER OF GEN Z

By Eliza O'Neill '27

Reporter

Choate welcomed this year's Phillips Speaker, Mr. John Della Volpe, to campus on November 1. Mr. Della Volpe, Director of Polling at Harvard's Kennedy Inpolitical analysis and generational addressed the Choate community during School Meeting, hosted a Q&A, attended individual classes, and conversed with students. His visit was an opportunity for members of the community to explore the concerns of today's youth, the polarization of political discourse,

The process of selecting a Phillips Speaker is intricate. Each year, members of the HPRSS Department aim to identify an individual who can speak to current issues in ways that will resonate with students and offer valuable insights into present-day challenges. According to Director of Studies Ms. Ellen Devine, the selection committee works closely with faculty, students, and senior leadership by conducting a thorough review of current events to find a speaker who can engage with relevant topics.

This year, the committee sought to highlight the ambition and resilience of Gen Z, a generation often misunderstood by older generations. Ms. Devine said, "This generation has the capacity to be the change they hope to see in the world. Mr. Della Volpe's work focuses on this directly, and with the timing of the election, he was the ideal person to come to campus."

"Gen Z is in-ful Gen Z is as a voter base gives engagement. During his visit, he credibly resilient," Mr. Della Volpe said. "While they are deeply concerned about their future — particularly regarding climate change, economic instability, and mental health — they also demonstrate a strong desire to shape the future in on Mr. Della Volpe's argument a positive direction."

He also addressed the misand the growing influence of Gen Z. conception that Gen Z is politically disengaged. Mr. Della Volpe highlighted that young people are more politically active than previous generations, mentioning the statistic that Gen Z's participation rate in midterm elections is double the percentage of Mr. Della Volpe's generation when they were the age of Gen Z. He also pointed out the widespread success of social movements driven by the youth, such as a lasting impact and a sense of those addressing gun violence, climate change, and student debt.

Mr. Della Volpe also emphasized the ability of young people to influence other young people socially and politically. Even though Gen Z is often perceived as burdened by various challenges, Mr. Della Volpe reminded students that this generation has a unique capacity for mobilizing change. "The future is in their hands," he said. Gen times, our generation needs to Z is already playing a major role in advocating for social, environmental, and political change, from local to global movements. Mr. Della

Mr. Della Volpe's presentation Volpe called on older generations

Mr. Della Volpe's message me hope personally. The fact that Gen Z played such a large role in the [2024 Presidential Election] also makes me feel like I have more of a say and a voice."

Andy Stahlman '26 reflected that young people are ultimately concerned about the same issues regardless of political beliefs. "I felt like the core message that Mr. Della Volpe got across was [that] our generation, regardless of political affiliation, cares more about each other than about being divided by politics," he said. "We are all founded on the same moral values of empathy, and our generation is united unlike any before."

Mr. Della Volpe's visit left heightened responsibility on the Choate community. His insights into Gen Z's shared concerns, the importance of political engagement, and the potential for positive change left students feeling inspired to shape the future. "Mr. Della Volpe opened my eyes up to the resilience of our generation. Especially in such contentious and uncertain step up to lead," Stahlman said.

who are less familiar with it, but smaller space. Despite this limitaalso to "give people the feeling that tion, Ruutz-Rees was filled with the buzz of students and faculty alike. Biology teacher and faculty club adviser for CSAA Ms. Mallika Beach-Mehrotra shared that the turnout rate was incredibly high, and students stayed for hours. "Everyone had a really nice time just

> sitting and talking and getting to enjoy each other's company," Ms.

Beach-Mehrotra said.

Attendee Eliza Aldrich '27 the entire building, adding to the I think it's so cool to have some awareness of other traditions," she said. This sentiment was echoed by other event attendees, including Rielle Reyes '27, who found the importance of Diwali to be "celebrating each other's cultures and how much you can enjoy learning from one another."

Despite its success, the CSAA cabinet faced challenges while organizing the Diwali event. Khokha said, "I think the toughest part of planning was probably finding the right time because so much stuff has been going on recently, and it's hard to celebrate Diwali on the day of Diwali." The Phillips speaker on November 1 also limited the cabinet's opportunities to promote the event.

Nonetheless, according to CSAA Vice President Sundari von Wentzel '25, seeing the Choate community come together and celebrate Diwali has been "incredibly rewarding." Von Wentzel said, "What I love about this event is that many non-South Asian community members come to celebrate their friends' and community members' cultures, which, as a South Asian student, makes me feel so seen and appreciated."

#### Connecticut Recovers from Rocky Neck STATE PARK WILDFIRE

By Rachel Fan '27 Copy Editor

On November 2, a brush fire consumed approximately 46 acres of Rocky Neck State Park in East Lyme, Connecticut. The fire prompted immediate action from local and state authorities, and the

trail system closed as firefighters

took on the flames.

Although the cause of the fire is unknown, its origin was traced to the park's hiking trails, an area frequented by visitors for its natural beauty. With record-setting warm temperatures and strong winds throughout Connecticut, the risk of fire increased in East Lyme, which may have contributed to this incident.

Upon receiving reports of the fire, the East Lyme Fire Dethe Connecticut Department of Energy and Environmental Protection (DEEP), swiftly mobilized sary to ensure public safety and to to contain the flames. Mr. James Fowler, DEEP's Senior Advisor on Outreach and Engagement, emphasized the severity of the situation, stating, "Connecticut is smoke permeating the area. "Peoexperiencing one of the driest fall seasons on record, with minimal rainfall since August."

## WHICH IS WORSE? JUNIOR SPRING VS. SENIOR FALL

By Chelsea Branch '25

Copy Editor

unior-year spring and senior-year fall are widely known as the two most intellectually and emotionally strenuous terms of a student's Choate career. Don't believe me? Look that characterizes freshmen and sophomores. Spoiler alert: You question remains: which of these eras is truly the most harrowing? Having survived both, I am confident that senior fall takes the cake.

go into responding to the infamous though we are expected to capture our life's purpose in a pamphlet of facts and figures. Not to mention, we are still responsible for keeping up with our extracurricular and academic responsibilities at Choate.

Indeed, the junior feels as though all eyes are on them; parents, peers, and social media constantly remind fifth-formers that "junior year matters most," pressuring students to begin bolstering their resumés and perfecting their grades. While this pressure is present for the entirety of junior year, the dreary weather makes it seem impossible to survive

the months of hard work ahead. However, juniors are asked to focus solely on afternoon activities and Choate's schoolwork. Dealing with college applications during your senior year is like adding another honors course to an already rigorous curriculum.

At Choate, teachers are ininto any upperclassman's eyes and credibly understanding when try to find a glimmer of the wonder a student needs a bit of grace. Didn't get much sleep last night? Maybe you can push that won't! There's no denying that history essay a day. Or perhaps both periods are grueling, yet the your previous test didn't go as planned. #### From Ping Pong to Basketball: Bridging Divides Through Sports Diplomacy

By Brendan Beng '26

Staff Contributor

n the 1970s, a chance encounter between American and Chinese ping-pong players catalyzed a diplomatic breakthrough known as "pingpong diplomacy." Given the onset of basketball all around the globe, there exists another opportunity for these two nations to induce cultural exchange and relieve political tensions using sports.

During a tournament in Japan, U.S. player Glenn Cowan missed his team bus and was invited onto the Chinese team's bus instead. This small act of sportsmanship has paved the way for a monumental shift in global politics. Shortly afterward, American and Chinese table tennis teams exchanged visits, ultimately culminating in President Richard Nixon's historic visit to China in 1972. Nixon's visit marked the first significant step in opening relations between the two nations, which had been estranged for over 20 years. "Ping-pong diplomacy" showed the world that sports could be a neutral ball, which is especially prom-nerships with Chinese teams tween different countries.

With these examples in how sports figures can some- approach could help improve

Chinese-American relations. While table tennis opened doors in the 1970s, basketball could do the same in the 2020s. Organized exhibition games, youth training camps, and cultural exchanges between NBA players and Chinese athletes could foster a sense of camaraderie and understanding between the two countries. Such events would celebrate a shared love for the sport, creating positive associations that can extend beyond basketball courts. This type of grassroots diplomacy, centered on people-to-people connections, can often be more effective than formal negotiations in changing public perception and easing hostilities.

In an era marked by global division, it's important to remember the lessons of pingpong diplomacy. As The New York Times once said, "When politics and sports intersect, they offer a glimpse of a different reality, where nations meet on the court instead of the battlefield." Through basketball, the United States and China have a unique opportunity to build bridges at a time when global harmony seems increasingly fragile. If embraced thoughtfully, "basketball diplomacy" could pave the way for a ican relations, reminding both nations of the power of shared human experiences and the potential for mutual respect.

#### Tax the Rich: Make the Wealthy Pay Their Fair Share

By Zaki Shamsi '26 Opinions Writer

until it hurts.

Billionaires like Elon Musk, Jeff Bezos, and President-elect excuse: "But billionaires are job Donald Trump P'oo can afford to shed a few tears. While they're sobbing into their luxurious yachts, the rest of us can finally fund public schools, healthcare, and infrastructure without relying on bake sales or crowdfunding for medical bills.

Here's the truth: the tax system isn't just broken; it was designed to let the wealthy off the hook. Take Elon Musk — the poster child for tax evasion. Instead of taking a salary, Musk gets paid in stock options, meaning that he is exempt from paying income taxes. When Musk needs cash, he borrows against his stock, avoiding capital gains taxes. The average person can't borrow against billions in stock; they're stuck paying taxes on every dollar and coin they earn, while Musk uses his wealth as a tax-free piggy bank.

And then there's Donald Trump. Trump has declared bankruptcy six times, using the system to dodge responsibility while every-

nos fail, his contractors go unpaid, public systems like roads, educabut Trump walks away with his tion, and healthcare, which these personal wealth untouched. Bank- companies rely on to make their et's stop pretending that ruptcy laws weren't meant to be a operations possible. the ultra-wealthy will ever billionaire's safety net, but Trump's they owe. They won't, and it's time ular people lose their homes and to face that reality. The solution to savings when they go bankrupt, this problem is simple: tax the rich whereas Trump loses a bad investment and gets to keep his fortune.

> Now, I can already hear the creators! If we tax them too much, they'll stop investing, and innovation will die." Let's dismantle that myth right now. Billionaires don't create jobs out of altruism. Take Jeff Bezos' Amazon: Bezos didn't build a logistics empire because he wanted to create jobs — he did it to make a fortune. Yes, Amazon employs thousands, but many of those workers face grueling conditions and minimal benefits. Meanwhile, Bezos has seen his wealth skyrocket, all while Amazon pays little to no federal taxes.

Billionaires would never stop investing in their companies despite increased tax rates, as these companies are simply too profitable, making it senseless for them to abandon innovation due to increased taxes. Moreover, innovation wouldn't grind to a halt. Companies invest because there's profit to be made, not because tax policies are too lenient. The reality is that higher taxes won't stop innovation, but rather ensure that one else picks up the bills. His casi- wealth is redistributed to fund

Raising taxes on billionaires willingly pay society what turned them into just that. Reg- won't kill jobs, and it won't stifle sure that those who benefit the most from our economy properly contribute to the society that allows them to thrive. If a billionaire sheds a few tears over higher taxes, so be it; they'll still be billionaires. Meanwhile, we'll have the resources to fix roads, fund schools, and provide healthcare for millions of people who need it.

Tax the rich, and tax them hard. Close the loopholes, tax stock options as income, and make billionaires pay capital gains taxes like everyone else. Will they cry? Absolutely. But their tears won't dry up any faster than their bank accounts will. They'll still be richer than 99.9% of Americans, even after paying their fair share. In the meantime, we can start fixing the systems they've prevented funding for for far too long. If we don't start holding the ultra-wealthy accountable, the "middle-class" politicians so keen on name-dropping will be left picking up the pieces of a broken society.

#### DONALD TRUMP'S IMMUNITY IS NOT WHAT IT SEEMS

By Josh Pan '27 Opinions Writer

t's natural for humans to yearn for steadfast leaders. During his near-decade-long political career, President-elect Donald J. Trump P'oo has positioned himinvincible figure through exploitative methods and sheer luck. And yet, it's important to reflect on how such conclusions can skew our un-

derstanding of politicians. Recently, we witnessed two attempted assassinations of Trump within the span of three months: one at a rally near Butler, Pennsylvania, and the other at his golf club in West Palm Beach, Florida. What seemed like a typical Trump rally held in Pennsylvania on July 13 quickly turned into chaos when the shooter, 20-year-old Thomas Matthew Crooks, fired at the stage. Stray bullets killed a spectator, critically wounded two others, and grazed Trump across his right ear.

Before Trump was promptly escorted off the stage, photojournalist Evan Vucci of The Associated Press captured what may be the most memorable picvaliantly in an act of defiance patriotic American flag waving spread and vicious criticism made

in the background. The media by his dissidents. And yet, this isn't coverage around his assassination, both in the realm of social media and diplomatic conversation, garnered sympathy and checks and balances inherent to subsequently political support our government structure, and exfor Trump's campaign.

self, literally and figuratively, as an viral online. Images of the assassination attempt circulated with Trump dancing to 50 Cent's tinction that while Trump is inces-"Many Men (Wish Death)," which jokingly draws parallels to an earlier sensation surrounding the delinquent nature of Trump's mugshots. In fact, Trump is no stranger to controversy — from his 1995 tax filings declaring a loss of \$915 million, which could have exempted him from taxes for up to 18 years, to the two articles of impeachment for which he was tried by the House of Representatives, to his harsh immigration regula-

tions made on border security. And yet, Trump has risen back to power. Time and time again, he has been acquitted and pardoned, allowing him to continue engaging in American politics. Trump has become the first collectively strive towards a better president in American history to have been a convicted felon, and ture of the year: Trump with a yet he's still managed to run as certainly not Trump, is exempt bloodied face and blood dripping a major-party candidate to seize from critical commentary. down his ear, his fist pumped the 2024 presidential election.

To the public, it may seem that against political violence, and a Trump is immune to the wide-

exactly accurate. He has exploited legal loopholes, employed his presidential power, exercised the perienced great luck in surviving all The news instantly became attempts made on his life through-

out his political career. It's essential to make the dissant, he is not invincible. Positioning any political leader as someone immune to censure and condemnation may encourage the public to abstain from ever making an effort to criticize these politicians. The result would be the devastating destruction of democracy -alack of discussion due to people having given up trying to resist whom they disagree with.

Once a politician is widely regarded as invincible, they become increasingly immune to the checks and balances in our federal government meant to curb corruption and ensure democracy. In order to encourage our politicians to consider a wide array of perspectives and to future, it is essential — regardless of partisanship — that no one, and

#### Teaching Together and Friendships Forever: Choate's Faculty Duos

By Deyi Meng '26 Copy Editor

Between creating lesson plans, grading tests, and attending meetings, faculty friendships are bound to blossom. While students may not give much thought to their teachers' BFFs, faculty members forge bonds that extend beyond professional collaboration. Here's a look at some of Choate's most cherished faculty friendships.

#### Mr. White and Ms. Salot

English teacher Ms. Amy Salot and Humanities teacher and Director of Athletics Mr. Tom White share a long-standing friendship rooted in their similar personco-teaching the American Studies course. "We both really love teaching and learning," Ms. Salot said.

The two are supportive of each other, offering advice both inside and outside the classroom. This collaboration has shaped their teaching over the years and encouraged professional growth. "We have a really good rapport in terms of thinking about how we're both teaching our material and what we can learn from each other ... that has helped my teaching evolve tremendously over the years," Mr. White said.

motions or do the same thing ev- Stone Age and The 1975. ery year. He is constantly learning and challenging himself."

grown into a strong support system for one another. "It's nice to have somebody who can give you another perspective and somebody who has my back," Dr. Roca said. They remind each other not to take on too much work and serve as a listening ear for one another. "Dr. Roca is awesome, a great listener, and [though] Dr. Roca will not talk about it, she's absolutely brilliant," Dr. Hodge said.

#### Mr. Akins and Mr. Minneman Humanities teachers Mr.

Jonas Akins and Mr. Jesse Minneman also share a unique bond. Coincidentally, when Mr. Minneman left Kent School and came to Choate, Mr. Akins took his place at Kent, teaching the same classes and even sitting at his old desk before arriving at Choate in

and dark versions of each other, as school; both teachers coincidentheir weddings!

Since Mr. Akins' arrival on Their friendship has also campus, their connection deepened through living together in Spencer House. In addition, Mr. Akins and Mr. Minneman share many on each other as support systems. common interests, such as history, coaching, and golfing. Their families enjoy socializing over dinners cooked by Mr. Minneman, beach trips, and skiing. Recently, the pair also joined a trivia night team within the HPRSS department called the Quizly Bears.

The two regularly support each other at Choate while keeping things light-hearted during busy boarding school life. "Places like ships between teachers are more this can be a lot. ... [Having] somebody who has done many of the same things and who is living in the these relationships play crucial same sort of environment makes it that much easier to feel close and supported," Mr. Akins said. Mr. Minneman echoed this sentiment: "[Mr. Akins] does a great job of balancing playfulness joking with

being willing to think seriously about things," he said. "He's got a pretty [great] sense of humor, ... so it becomes sort of a release valve to hang out with him."

#### Dr. Pfeil and Ms. Sorrells

Math teacher Dr. Jessica Pfeil and Math Department Head Ms. Andrea Sorrells became acquainted with each other after Dr. Pfeil joined Choate in 2016. Their relationship has evolved over the years from mere colleagues to friends as a result of shared experiences, such as having children in elementary school and attending teacher conferences across the country in San Antonio, San Diego, and Seattle. The two also share many hobbies, including interior design, shopping, eating out, going to Starbucks, and hosting intramural hiking in the Spring. They even journeyed together to Greece during the summer of 2024!

Dr. Pfeil and Ms. Sorrels rely Dr. Pfeil said, "We've each had our really tough times, and we're there for each other." Sharing this idea, Ms. Sorrells said, "[Dr. Pfeil] is just an amazing person who really cares about people, and when she's your friend, she's your friend for life. And you know you can count on her for everything."

Behind office doors, friendcommon than you may think. While they often go unnoticed, roles in supporting faculty mental health and facilitating a happier Choate community.

# Choate Fall Productions: The Guy Who Didn't Like Musicals and Eurydice

By Elizabeth Burgstahler '26 and Ha Jin Sung '28

Staff Reporter and Reporter

#### The Guy Who Didn't Like Musicals

From October 31 to November 2, Choate students took to the stage with a rendition of The Guy Who Didn't Like Musicals. The musical follows the journey of Paul and his friends in their race to save humanity from a musical apocalypse.

Jordan Dodd '25, who played the characters Mr. Davidson and Sam, expressed how fun mentoring younger students as a sixth-former was. "I really liked how I was able to work with my prefectees on this musical," he said.

Dodd also explained how the cast bonded over activities beyond the musical. One of his favorite memories was when the entire cast recorded a TikTok trend during rehearsal. "The entire cast did that with our director. It was really silly, but it was the mark of a great, great era for all of us," he said.

Leanne Parks '25, who played Charlotte and Nora, explained how she and Dodd choreographed the musical tothe show together on stage was ing very happy and excited."

In other ways, there's a joy Eurydice from Eurydice's per- spin on a classic retelling, as or a relief or escape." spective. Ruhl sets her show in well as the character's personthe 1950s rather than ancient alities. "The characters are so Elizabeth Burgstahler'26 and Ha relatable," Mrs. Doak said, "and how they deal with love, loss, and the importance of holding

onto memories is a good message to be reminded of."

Because Eurydice is a blend of tragedy and comedy, the actors had to explore both sides of emotion for each character. Actor Maya Abeles '28 played one of the stones: a group of six cast members. Abeles said, "Especially as a stone, you fully play off of each other's emotions. It's such a small cast that if one person comes in and they're not into it, then no one's gonna be able to perform the way they want to."

From a technical perspective, Eurydice posed several challenges. Technical Director Mr. Mark Gostomski noted the size of the show as a particularly challenging aspect. "As far as the scale of the show, it's using almost every single stock piece of scenery that we have, which is something that we haven't done as much," he said. "there's just a lot of surface area that we were creating."

In the days leading up to the show, the cast and crew members thought about how the audience might perceive the show. It was hard to anticipate how the audience would balance their responses between the comedic elements and the tragic elements. "It makes you think about life, and how even in really hard times, there's something

# Medium: A Photographic Journey of Discovery

By Bruce van Wingerden '28 Reporter

Digital Media Design I, and Dig-

ital Photography I teacher. his shoot stemmed from his curiosity and desire to capture "society as it is at the moment," he said. "I like to take on something how to do it ... [I] wanted to capture the heat in the haze and how everything seems to slow down to a halt in the summertime."

Mr. Kelsey experimented with a traditional analog camera to take all his pictures for "Medium." This allowed him to explore different photography techniques while using his camera to connect with others. He recalled, "People will stop you and ask questions, like, what are you doing? What is that? And that leads, sometimes, to me asking if

to Washington D.C. "I wanted to them up there." Capturing the essence of calm capture the tone of ... the epicenand leisurely East Coast sum- ter of a lot of political culture, ... mers, "Medium" is the newest and I wanted to meet new people," Paul Mellon Arts Center (PMAC) he said. In total, Mr. Kelsey took exhibition. It is brought to the around 150 photos. "You have to community by Mr. Matt Kelsey, be really picky about what you take Choate's Digital Filmmaking I, a picture of because there's a lot of time involved," Mr. Kelsey said. After capturing the photos, the film Mr. Kelsey's inspiration for has to be sent to a lab, where it is processed and scanned. It then undergoes an editing process, which can take up to a month and a half.

Choosing a select amount I haven't done before, and learn of images from his collection of 150 pictures was no easy task. Mr. Kelsey spent considerable time comparing pictures and making decisions related to the vibrancy, colors, and composition of each image.

When comparing two photos of a building, he said that he "couldn't justify putting both on the wall when [he] had a limited display." Mr. Kelsey also aimed to present images that would be "easily visually read and understood, [like] something that you can look at from across the lobby and [understand]." However, he

Going into this project, Mr. said, "If [I] didn't have a limited Kelsey knew he wanted to travel amount of space, [I]'d put all of

> One of the key messages Mr. Kelsey hopes to share with his students is that it's never too late to start learning something new. "I'm much older than [my students] ... [yet] I'm still learning brand new stuff, I'm still taking on new challenges, and trying tools I've never tried before," he said. He also emphasized that "exploration of [photography] doesn't necessarily have to end when the term ends ... they can continue and grow ... the idea of expertise doesn't end when your education is complete."

> Mr. Kelsey shared that he's felt especially supported while at Choate. "I feel like this is a place that values one another ... you have to be feeling secure and happy in order to free yourself up to use your imagination, and take risks," he said. "This has been a really great opportunity for me to really do my own thing ... to show people what my point of view is."

# CHOATE'S MODERNIZATION OF ARCHITECTURE

Lanphier Center, opened in 2015, is one of the most modern-style buildings on campus.

By Parker Jackson '28

Reporter

From white picket fence houses to grand cathedrals, the world has a plethora of architectural styles. At Choate, the variety of architectural styles is reflected in the buildings on campus and the furniture inside them. While the School may have started with only New England-esque brick buildings, as seen in St. John Hall and the Paul Mellon Humanities Building, it has recently expanded to include more modern styles, such as the Lanphier Center and the Paul Mellon Arts Center.

As campus buildings are one of the first things prospective students see when they visit the School, people will naturally be drawn to the architecture that resonates with them the most. That is why modernizing such a historic campus could be controversial. While some students argue that the School should not be changing such a large part of its history, others argue that this change is necessary.

looks similar to the library and the fore and after the construction of dining hall, the interior is more Lanphier Center in 2017, reflected modern. John Jannotta '25 argued on this phenomenon. She said, "I that "[The renovators] have begun think the School is trying to keep

They take out the old furniture that people will want to spend time had a really homey vibe to it, and then they're putting in this new, lifeless, SAC-like furniture, and I'm not a big fan of that." On the other hand, Kathy Atwiine '25 said, "I'm pretty impressed by the SAC. It's very modern, looking inside the couch spaces. Also, the idea of boarding and day students having a place to come together, I like that."

Many students believe the shift to modern architecture is doing away with Choate's past. However, carrying over past designs into new designs has always been a focus when making renovations on campus.

The architecture on campus plays a key role in shaping prospective students' impressions. Science teacher Mr. Deron Chang said, "I think [the architecture] has a significant role when students can picture themselves walking the halls on campus...I think that makes them feel like this is a school that isn't so stodgy, but also one that has traditions."

Mrs. Kristen Chin, a math While the exterior of the SAC teacher who worked at Choate beto do what I call 'SAC-ification.' it looking clean and fresh so that

there. I think the School has tried to keep itself modern and competitive, while still maintaining what is historic." These contemporary styles make the campus more functional and enjoyable for the community while maintaining the School's rich history.

Some architecture is designed to create the illusion of other styles. For instance, Mr. Chang described how some buildings and design features don't fully represent the aesthetics they seem to. "I'm less excited about things that are made to look old when they actually were not. The columns that we see associated with Memorial House, Hill House, and Archbold are Greek columns, but were obviously not built in the Greek city-state empire. So they're kind of fake [and] I'm not really as excited about things like that are not real."

The everyday buildings that Choate students pass on each walk to class reflect a diverse range of architectural styles and histories. While modernization remains a topic of debate, it is undeniable that Choate's campus has embraced a modern transformation.

# SIBLINGS BY CHANCE, TEAMMATES BY CHOICE

Staff Reporter

Siblings experience a unique blend of rivalry and camaraderie with one another when they play on the same team. While this dynamic isn't always easy, many sibling duos find that having a relative on the team pushes them to become better athletes, adding a new level of motivation to their game through their pre-existing sibling rivalries. The support and challenge of having a sibling as a teammate can be incredibly beneficial, fostering both individual growth and a deeper holistic team bond. Sarah Coyne '27 and Maeve Coyne '27, twin sisters on the Girls' Varsity Squash Team, and Justin Lee '25 and Jamie Lee '27, brothers on the Boys' Varsity Soccer Team, have experienced how sibling dynamics impact sports performance through competition, shared success, and the pressure of comparison.

One significant advantage of playing alongside a sibling is the natural, built-in competition. Siblings often compete over small, everyday things, from who gets the last piece of pizza to seating arrangements at the dinner table. This competitive spirit is amplified in the sports team setting, and Sarah and Jamie agree that their friendly rivalries have been an incredible motivator.

"Playing on the same team as my sister has definitely pushed me more and created a competitive environment each practice and game, which helps us both improve," Sarah explained. Jamie and I do the same for him. It's echoed this sentiment, reflecting on how far his brother has pushed him: "We've both been playing soccer since we were really young, and it's great to be on the same are siblings or not. team now," he said. "When I was a freshman, having him around to siblings remain committed to has profoundly impacted the show me the ropes was awesome. supporting one another as team- Lees' and Coynes' time at Choate. Now, when he's on the pitch, I can mates. They recognize that their The camaraderie of these teams, cheer him on, and when I'm on, bond extends beyond mere comhe's cheering me on."

sports teams does create challenges. The intense competition can heighten tension between siblings, particularly during car mental blocks. "Even though rides after tough practices or we are very competitive on the challenging matches that de- court, we both have the same termine their rankings on the goals and want each other to sucteam. "Having a sibling in the ceed," Sarah explained. This unsame sport pushes you to improve, but it also heightens the environment where their sibling competitiveness, which can be relationship can remain strong frustrating," Sarah said.

Justin Lee '25 and Jamie Lee '27 compete for Varsity Boys' Soccer.

Jamie added that the intendraining: "Sometimes it gets annoying, like when we're being training. It can get frustrating," he said. The emotional ups and downs of competition can lead to moments of stress, but they are outweighed by mutual trust and keeping each other in their best interests. Jamie is grateful for season, Sarah recalled her fahis brother's presence and has benefited from his advice: "We help each other improve by giving tips and pointing out what's going wrong," he explained. "When Justin sees I'm doing something wrong, he'll tell me, just encouragement — pushing each other to get better." That mindset is central to every Choate sports team, whether players

petition; no matter how intense However, sibling rivalry on the rivalry on the court or field, they consistently offer one another constructive feedback and help each other work through derstanding creates a supportive despite the competition.

These siblings' experiences sified comparison because of have created memories they will their shared last name can be cherish forever. Moments of pure bliss, like when Jamie scored his first varsity goal beside his brothcompared, or who scores first in er on the field, make every tough practice session worth it. "When I scored my first goal, he was on the pitch too. And we celebrated together. That's probably the best moment," Jamie said.

Reflecting on the previous vorite athletic memory: competing in the National High School Team Squash Championships with Maeve. "That was a super fun and memorable experience, and I loved doing it with my sister by my side," she said. The thrill of competing at such a high level and the joy of sharing that experience with her twin has solidified their bond even further.

Ultimately, being a part of the Choate Girls' Varsity Squash Despite the challenges, these and Boys' Varsity Soccer teams combined with their unique sibling dynamic, has created a space where both siblings can grow as individuals and as team members. Every moment spent together, whether celebrating victories or navigating challenges, has made their experiences all the more special. These journeys as teammates has been about deepening connections and creating memories that will last a lifetime.

# MEET THE C-TRAIN'S CHOREOGRAPHERS

By Karolina Zaccareo '27 Reporter

On the eve of Deerfield Day, varsity teams and Senior Soccer gathered in Colony Hall for Pep Rally — a night of spirited skits and wild dance routines to get the School hyped. Each team hit the stage with their unique spin on the pre-game tradition. To perfect their moves, many teams called in Choate's seasoned dancand Sophia Liao '25, who took on choreographing this year.

Montler, a two-year experienced hip-hop dancer and co-president of the Hip Hop Club at Choate, is also a member of the Girls' Varsity Field Hockey Team. She took charge of her team's choreography after Girls' Varsity Field Hockey Captains Cawthra Burns '25 and Elisabeth Hargett '25 asked for help. Throughout open to her teammates' ideas, and knowing that many people on the team had no background in dance, she "made it easy and captains discussed aspects they incorporated hard parts but was

field hockey team member Mary-Jaine Malonis '27 said. Montler and Malonis were eager to see the crowd's reaction when Ellie Silva '26, disguised as the Lorax, arrived on stage. After weeks of preparation and learning Montler's choreography, Malonis's perspective around dancing shifted. "I'm very open-minded to dance, and it's not as scary as I used to think it was," she reflected.

Liao, a two-year Step Squad ers, such as Alyssa Montler '25 member, choreographed the Girls' Varsity Volleyball's dance number with a "light-hearted" approach. Even though there were some tricky parts to her choreography, Liao made sure that the team would nail it on stage. Team member Izzy McGehee '27 praised Liao's teaching skills and said, "She went out of her way to teach us the dance, and I'm really grateful for that ... I don't think we could have done it alone."

Throughout the choreothe process, Montler was very graphing process, Liao prioritized including the team's ideas in the dance. Before planning the choreography, Liao and the wanted to include in the chorevery good at teaching [them],"

choice, and partner work. Because this year is Liao's it was particularly special to her and she was grateful to contribute to the "seniors being able to create lasting memories." ography, such as the banner that Montler and Liao were super successful Pep Rally is in the
