The Sun

Day

X

Night

1.  Color the Sun, Earth, and paper you.
2.  Cut out the Earth and the drawing of you.
3.  Poke a brad through the dot in the center of Earth, then through the X on the Sun paper. Flatten the brad so the Earth can spin on the background paper.
4.  Glue paper you onto the Earth. When you are on the Sun side, it is day. When you are on the other side, it is night.
