ESSER Pre-Approval Request

Name of LEA Representative Requesting Approval	D'Lana Barbay
Email Address	dbarbay@bmtisd.com
Name of LEA	BEAUMONT ISD (123-910) - ESC 5
CDN (Please confirm and re-enter CDN from Name of LEA field above.)	123910
ESC Region (Please confirm and re-enter ESC Region from Name of LEA field above.)	5
Start Date of Planned Project	08/01/2021
End Date of Planned Project	12/01/2022
Type of Cost/Project	Renovations and Repairs - air quality

Description of Cost/Project	$4,976,000 IAQ-CPR Dual-Ionization regulation controls the production of both positive and negative ions. This system creates and maintains an optimal ion balance by sensing, predicting, and managing air ionization levels. This technology kills pathogens including coronavirus, influenza, colds, mold spores, salmonella, and eliminates ammonia. These pathogens ae rendered inactive by disrupting the pathogen's surface proteins which eliminates their ability to replicate. The air is cleaned by agglomeration and is captured in filters.
How does the proposed project meet the intent of the ESSER Grant Program?	The implementation of electronic area cleaners and air quality improvements are shown to actively measure temperatures, humidity, pressure, VOC, PM counts, CO2 and ionization levels. Improved air quality will lower virus distribution and provide for clean air and less illness. Less illness will result in reduced absences which will aid in making up the learning loss gap. Studies have also shown that true variable ionization has a positive effect on cognitive ability.
The LEA assures that the proposed construction meets the requirements of Davis-Bacon.	☑
The LEA assures that, to the greatest extent practicable, it will provide a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States (including but not limited to iron, aluminum, steel, cement, and other manufactured products). The LEA will include this domestic preference in	☑

all subawards including all contracts and purchase orders for work or products under this award.

The LEA assures it has read and will follow the guidance provided in TEA's ESSER FAQ document related to project costs requiring pre-approval. ☑

ESSER Pre-Approval Request

Name of LEA Representative Requesting Approval	D'Lana Barbay
Email Address	dbarbay@bmtisd.com
Name of LEA	BEAUMONT ISD (123-910) - ESC 5
CDN (Please confirm and re-enter CDN from Name of LEA field above.)	123910
ESC Region (Please confirm and re-enter ESC Region from Name of LEA field above.)	5
Start Date of Planned Project	08/01/2021
End Date of Planned Project	06/01/2023
Type of Cost/Project	Renovations and Repairs - HVAC

Description of Cost/Project	$695,000 Installation of M2G Advanced Load Monitoring (ALM) boiler controls, to reduce boiler runtimes and associated utility costs, as well as, increase equipment life expectancy. This scope includes fifty-three (53) boiler unit installations over twenty-five (25) school/ district sites.
How does the proposed project meet the intent of the ESSER Grant Program?	The M2G boiler controller increases the efficiency of the boiler system, leading to an increase in efficiency of the heating systems, but also allows improved humidity control in the mechanical systems. Having less humidity will reduce virus load in the air which will mitigate COVID-19 transmission thus students will attend school and the learning gap can be closed.
The LEA assures that the proposed construction meets the requirements of Davis-Bacon.	
The LEA assures that, to the greatest extent practicable, it will provide a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States (including but not limited to iron, aluminum, steel, cement, and other manufactured products). The LEA will include this domestic preference in all subawards including all contracts and purchase	

orders for work or products under this award.

The LEA assures it has read and will follow the guidance provided in TEA's ESSER FAQ document related to project costs requiring pre-approval. ☑

ESSER Pre-Approval Request

Name of LEA Representative Requesting Approval	D'Lana Barbay
Email Address	dbarbay@bmtisd.com
Name of LEA	BEAUMONT ISD (123-910) - ESC 5
CDN (Please confirm and re-enter CDN from Name of LEA field above.)	123910
ESC Region (Please confirm and re-enter ESC Region from Name of LEA field above.)	5
Start Date of Planned Project	08/01/2021
End Date of Planned Project	08/01/2023
Type of Cost/Project	Alterations

Description of Cost/Project	$258,000 Installation of the HYPOGEN sanitizing and disinfecting solution. HYPOGEN is a stand alone, on-site generator optimized to produce hypochlorous acid with neutral pH. The system converts salt, water, weak acid, and electricity into an effective solution that can substitute for a number of conventional chemicals used on a daily basis. Neutral Electrolyzed Water (NEW) is an all-natural, organic, non-toxic, non-irritant, environmentally and ecologically safe sanitizing and disinfection solution. This system will will service the entire district with disinfecting solution to sanitize over 3.7M square feet of interior building space.
How does the proposed project meet the intent of the ESSER Grant Program?	The HYPOGEN system will allow the district to sanitize frequently is a cost-effective manner. Additional sanitization will lead to reduced transmission of viruses including COVID -19. Increased sanitizing should cause less illness and increased attendance which will help reduce and close the learning loss gap.
The LEA assures that the proposed construction meets the requirements of Davis-Bacon.	☑
The LEA assures that, to the greatest extent practicable, it will provide a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States (including but not limited to iron, aluminum, steel, cement, and other manufactured products). Subject: Confirmation - ESSER Pre-Approval Request
To: <dbarbay@bmtisd.com>

Thank you for submitting your entry. A copy is included below for your records.

ESSER Pre-Approval Request

Name of LEA Representative Requesting Approval	D'Lana Barbay
Email Address	dbarbay@bmtisd.com
Name of LEA	BEAUMONT ISD (123-910) - ESC 5
CDN (Please confirm and re-enter CDN from Name of LEA field above.)	123910
ESC Region (Please confirm and re-enter ESC Region from Name of LEA field above.)	5
Start Date of Planned Project	08/01/2021
End Date of Planned Project	01/01/2023
Type of Cost/Project	Renovations and Repairs - HVAC

Description of Cost/Project	$9,600,000 This work will include a building automation controls update to all thirty-eight (38) schools/district sites. It will include: additional points added to monitor CO2 levels, point installation to allow proper control of outdoor air in guidance with ASHRAE 62.1 and provide improvement to outdoor air handler systems in guidance with ASHRAE 62.1. This work will also provide chiller plant updates which include allowing the chiller plants to adequately adjust for changes in outdoor air requirements and readiness from COVID-19 findings and allow for improvement to humidity control in guidance with ASHRAE COVID-19 guidance. Finally this work will upgrade air handlers. This scope includes cleaning, preparation and repair on existing air handling units; replacing air handling systems that are unable to adequately meet humidity and CO2 level guidelines while maintaining thermal comfort and retrofitting existing air handling systems that can be retrofitted with new motors/subsystems.
How does the proposed project meet the intent of the ESSER Grant Program?	This work will improve air quality throughout all thirty-eight (38) schools/district sites ensuring improved air quality. It will also allow us to implement measures to validate proper ventilation procedures are met through monitoring of VOC, CO2 and particulate matter in facilities. Improved air quality will decrease the ability of viruses to transmit and will reduce illness and thus reduce absences. Decreased absences can assist in closign the learning gap created by COVID-19.
The LEA assures that the proposed construction meets the requirements of Davis-Bacon.	☑
The LEA assures that, to the greatest extent practicable, it will provide a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States (including but not limited to iron, aluminum, steel, cement, and other	☑

manufactured products). The LEA will include this domestic preference in all subawards including all contracts and purchase orders for work or products under this award.	
The LEA assures it has read and will follow the guidance provided in TEA's ESSER FAQ document related to project costs requiring pre-approval.	☑
