COVERED APPLICATIONS AND PROHIBITED TECHNOLOGY REGULATION

1.1 PURPOSE

On December 7, 2022, Governor Greg Abbott required all state agencies to ban the video-sharing application TikTok from all state-owned and state-issued devices and networks over the Chinese Communist Party’s ability to use the application for surveilling Texans. Governor Abbott also directed the Texas Department of Public Safety (DPS) and the Texas Department of Information Resources (DIR) to develop a plan providing state agencies guidance on managing personal devices used to conduct state business. Following the issuance of the Governor’s directive, the 88th Texas Legislature passed Senate Bill 1893, which prohibits the use of covered applications on governmental entity devices. This regulation aligns with the Governor’s directive and Senate Bill 1893 to prohibit the installation or use of covered applications or prohibited technologies on applicable devices.

1.2 SCOPE AND APPLICATION

Where appropriate, each section will identify the unique entities to whom the section applies and the appropriate definitions.

2.1 DEFINITIONS

Pursuant to Senate Bill 1893, governmental entities, as defined below, must establish a covered applications policy:

- A department, commission, board, office, or other agency that is in the executive or legislative branch of state government and that was created by the constitution or a statute, including an institution of higher education as defined by Education Code Section 61.003.
- The supreme court, the court of criminal appeals, a court of appeals, a district court, or the Texas Judicial Council or another agency in the judicial branch of state government.
- A political subdivision of this state, including a municipality, county, or special purpose district.

This policy applies to all District full- and part-time employees, contractors, paid or unpaid interns, and other users of government networks. All District employees are responsible for complying with this policy.

A covered application is:

- The social media service TikTok or any successor application or service developed or provided by ByteDance Limited, or an entity owned by ByteDance Limited.
- A social media application or service specified by proclamation of the governor under Government Code Section 620.005.

2.2 COVERED APPLICATIONS ON GOVERNMENT-OWNED OR LEASED DEVICES

Except where approved exceptions apply, the use or installation of covered applications is prohibited on all government-owned or -leased devices, including cell phones, tablets, desktop and laptop computers, and other internet-capable devices.

- a. The District will identify, track, and manage all government-owned or leased devices including mobile phones, tablets, laptops, desktop computers, or any other internet-capable devices to: Prohibit the installation of a covered application.
- b. Prohibit the use of a covered application.

TECHNOLOGY RESOURCES: EQUIPMENT

CQC
(REGULATION)

- c. Remove a covered application from a government-owned or -leased device that was on the device prior to the passage of S.B. 1893 (88th Leg, R.S.).
- d. Remove an application from a government-owned or -leased device if the Governor issues a proclamation identifying it as a covered application.

The District will manage all government-owned or leased mobile devices by implementing the security measures listed below:

- Restrict access to “app stores” or unauthorized software repositories to prevent the installation of unauthorized applications.

2.3
ONGOING AND
EMERGING
TECHNOLOGY
THREATS

To provide protection against ongoing and emerging technological threats to the government’s sensitive information and critical infrastructure, DPS and DIR will regularly monitor and evaluate additional social media applications or services that pose a risk to this state. DIR will annually submit to the Governor a list of social media applications and services identified as posing a risk to Texas. The Governor may proclaim items on this list as covered applications that are subject to this policy. If the Governor identifies an item on the DIR-posted list described by this section, then the District will remove and prohibit the covered application. The District may also prohibit social media applications or services in addition to those specified by proclamation of the Governor.

2.4
BRING YOUR OWN
DEVICE POLICY

If the District has a “Bring Your Own Device” (BYOD) program, then the District may consider prohibiting the installation or operation of covered applications on employee-owned devices that are used to conduct government business.

2.5
COVERED
APPLICATION
EXCEPTIONS

The District may permit exceptions authorizing the installation and use of a covered application on government-owned or -leased devices consistent with the authority provided by Government Code Chapter 620. Government Code Section 620.004 only allows the District to install and use a covered application on an applicable device to the extent necessary for:

- (1) Providing law enforcement; or
- (2) Developing or implementing information security measures.

If the District authorizes an exception allowing for the installation and use of a covered application, the District must use measures to mitigate the risks posed to the state during the application’s use. The District will document whichever measures it took to mitigate the risks posed to the state during the use of the covered application.

3.0
POLICY
COMPLIANCE

The District will verify compliance with this regulation through various methods, including but not limited to, IT/security system reports and feedback to leadership. An employee found to have violated this regulation may be subject to disciplinary action, including termination of employment.

4.0
REGULATION
REVIEW

This regulation will be reviewed and updated as necessary to reflect changes in state law, additions to applications identified under Government Code Section 620.006, updates to the prohibited technology list posted to DIR’s website, or to suit the needs of the District.
