# CECIL HOTEL

The Cecil hotel, located in Los Angeles is one of California's haunting secrets. It's numerous deaths and unresolved mysteries have left guests uneasy and on edge. Its most notorious death would be 21 year old Elisa Lam, a college student from Canada.

In 2013 Elisa stopped at Cecil hotel for a rest from her trip around the US, what she didn't know was that this would be her final destination. She had gone missing the next day, and no one around seemed to know where she had gone. Leaked survelience footage revealed Elisa acting bizzare in the hotels elevator. There she could be seen talking seemingly to no one, jumping erradictly around the elevator before vanishing completely. She was not found until 19 days after being reported missing. Elisa was found in the Cecil hotels water tank, naked. Her death was ruled out as an accidental drowning, but many theories and questions have arised since her death. Who was she talking to? Why was she seeminly panicked? Was this a result of a manic episode? Or perhaps evidence of supernatural wonders beyond our comprehension.

No one knows for sure how she ended up in the hotels water tank, or how she seemingly vanished without any other security cameras catching her. What we do know is Elisa Lam's death was an unfortunate one, albeit mysterious.
