

3rd Grade Math and Science! (Week of Nov. 1st)

Math

We have been learning our multiplication facts. We have discussed and practiced strategies for 0,1,2,5,10, 3,4 and 6. Please help your child learn these facts by quizzing them at home. Have them explain to you a strategy to use when solving these facts. We are also turning our multiplication facts into division facts so they can see that inverse relationship.

Science

Students have been continuing to learn about animals through time. We have been able to answer Why do dogs wag their tails and What is the best way to get rid of Mosquitoes. Students are practicing working with partners during these science lessons. They are learning how to collaborate and communicate with each other in a respectful manner.
