

3rd Grade News

Highlights of the Week

Pics below show what students like doing during an indoor recess!

Math

Students have been learning more about area and how to find areas with rectangular and non rectangular shapes. They have been building models of multiplication expressions with our cuisenaire rods and are doing a great job with their understanding. Still working on using good vocabulary, but it is getting better each day!

Science

Students have been learning how clouds are formed and what happens to the water vapor. They completed an activity where they took hot water in a cup and covered it to observe what happens. They had to draw conclusions and make claims.

ELA

Students practiced with spelling and using contractions in OG class this week. They also continued their independent work through Literacy Menu, including independent reading, typing, and practicing their synonym and antonym knowledge.

Global Studies

Students worked on a project called their "My People & Me Flag" this week. They got to make a flag to show places, activities, and other elements of culture that are important to them and their families.

Conversation Starters

- What details did you include on your "My People and Me Flag" in global studies?
- What is a contraction? When or why might people use contractions? Can you give me the contraction for can + not? What about there + is? (shortened version of two words, used in more informal speaking and writing, can't, there's)
- What was your favorite part of Literacy Menu this week?
- What is a dividend?
- What is a divisor?
- What is a quotient?
- What is a factor?
- What is a product?
- What is a sum?
- What is a difference?
- How is a cloud formed?
- What is water vapor?
- Is water important? Why?
