Communication

Ms. Maria Q. Lamanilao Librarian

- Graduated Bachelor of Science in Computer Science
- Working overseas for Twenty-two years.
- Teaching for eleven years.
- Librarian for seven years.

Library curriculum can be used to enhance the reading curriculum and the writing curriculum.

Within the Quality Schools International Mastery learning framework 5-Year-old to 11-Year-old students must gain the ability to identify, access, evaluate and use information from the library and the internet. These skills will create independent learners by fostering students' research, information literacy, technology, communication, and critical thinking skills. It is of equal importance to instill a need to read for pleasure.

The Library 5 to 11 course is divided into two essential units, which the student must master. There are additional selective units, which can be pursued optionally as a class or as individual enrichment. Librarians are encouraged to work in collaboration with classroom teachers to have the greatest impact on the student achievement.
