

SCIENCE WORKSHOP

Academic Language Development and Supporting All Students in a 3D Science Classroom (K-12)

Are you ready to elevate your students' ability to think, communicate, and succeed in science? In this FREE engaging and practical workshop sponsored by the GaDOE, we will explore effective strategies for developing academic language in the context of 3-Dimensional Science learning. Academic language is the bridge between everyday speech and the specialized vocabulary and structures students need to engage with complex scientific concepts.
