

2024 Tools for Schools Survey Results

Overview: This survey is a collection of questions crafted over time by our long standing Tools for Schools Committee at Beecher Road School. This year the survey was sent out September 10th 2024 and left open 10 days. We had 48 responses. Upon review of this survey 2 separate building walkthroughs will be conducted by the committee to inspect and evaluate concerns. Upon receiving the results the committee expressed interest in altering the timing of the survey. Possibly coordinating the release with a staff meeting to raise awareness about the purpose of the survey and work to improve the number of respondents.

I understand where fresh air enters my room, and I am keeping it free from obstruction

48 responses

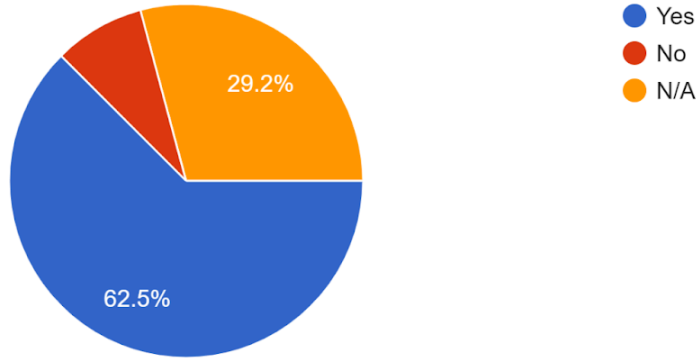

NOTES: The 1 "No" was from a new staff member. Upon receipt of the survey the staff member was alerted to the location of ventilation in the space. The 1 "N/A" was from a shared space. The other occupant of the room was aware of the location of the ventilation.

Classroom sink is cleaned daily?

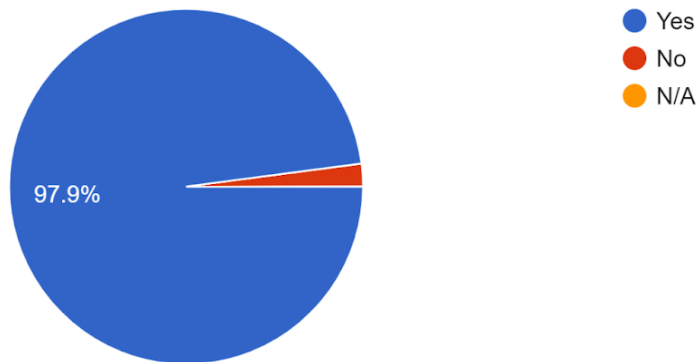

48 responses

NOTES: The 4 “No” responses were located in 4 different areas of the building. All custodial staff members were reminded about cleaning every sink every evening.

Trash receptacles are emptied daily.

48 responses

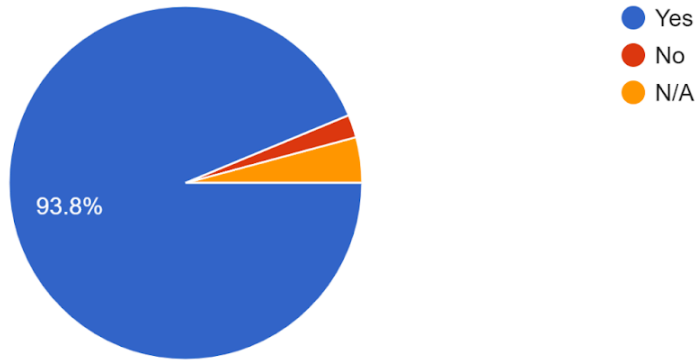

NOTES: The custodian who received the 1 “No” response was alerted to the issue.

2024 Tools for Schools Survey Results

Classroom carpets and floor areas are vacuumed and swept daily.

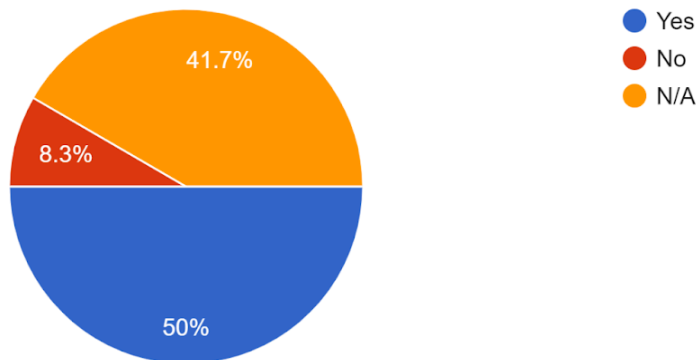

48 responses

NOTES: The custodian who received the 1 “No” response was alerted to the issue. The “N/A” responses were possibly in error as everyone has a floor in their space. Next year maybe updated wording on this question would be helpful.

Classroom lavatories are free of leaks and odors

48 responses

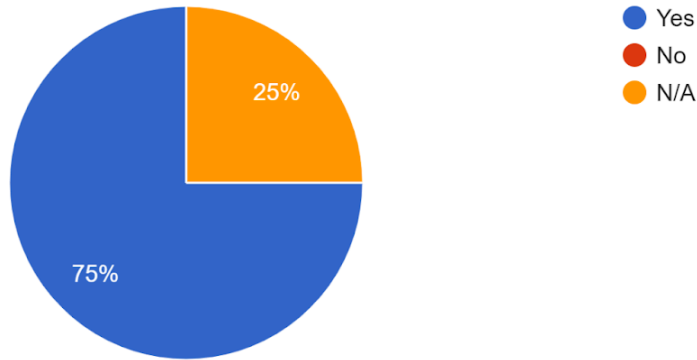

NOTES: 3 of the 4 “No” responses were concentrated to one area with a specific type of flooring. We are exploring ways to reduce the smell. All custodians with “No” responses were alerted to the issue.

2024 Tools for Schools Survey Results

Areas around and under classroom sinks are free of leaks

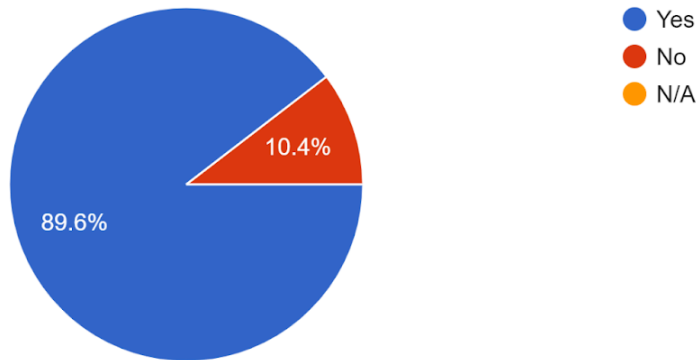

48 responses

NOTES: All "Yes" responses. No action has been taken.

Classroom is free of odor

48 responses

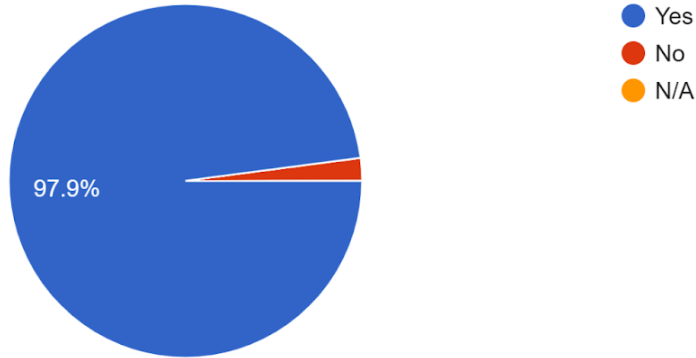

NOTES: The 5 "No" responses had varying locations. 2 pairs of the room were adjacent, the final room was in a different area. More investigation is needed.

2024 Tools for Schools Survey Results

Halls are free of odor

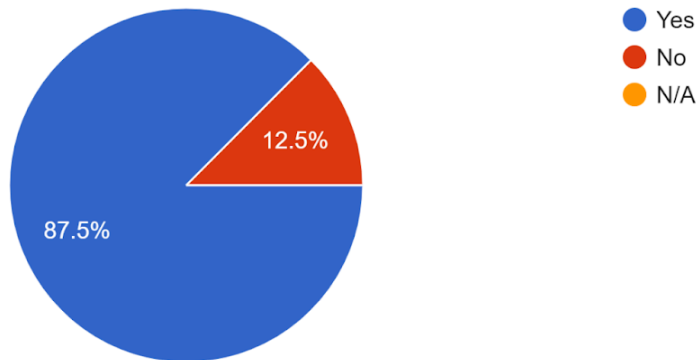

48 responses

NOTES: The 1 “No” response was from a room also with classroom and bathroom odor. More investigation is needed.

Ceiling tiles and walls are free of leaks (discoloration may indicate periodic leaks or condensate drip)

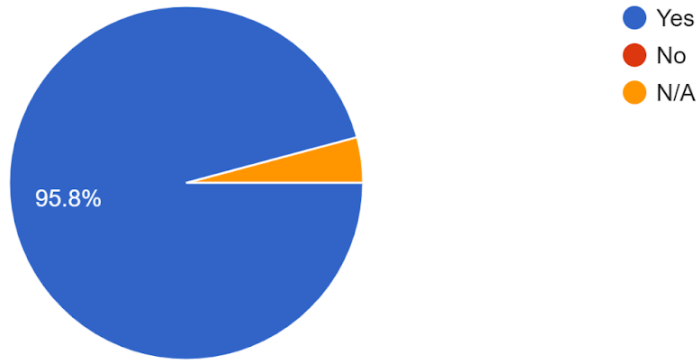

48 responses

NOTES: Out of the 6 “No” responses 3 were classroom spaces where the roof was replaced this summer. The tiles will be changed shortly and are inactive leaks. 2 “No” responses came from the same space, the leak is inactive and the tiles will be changed. The final “No” response was from the Science Lab and an active roof leak investigation is ongoing.

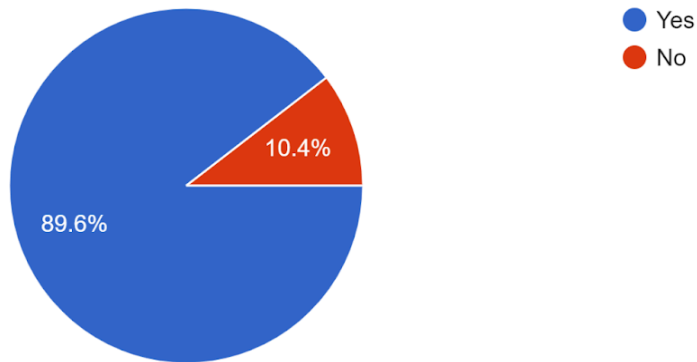

2024 Tools for Schools Survey Results

I understand which areas (i.e. desks) are not cleaned by custodians, and I maintain them regularly
48 responses

NOTES: The “N/A” responses were people who do not occupy classroom spaces.

My room is free of clutter
48 responses

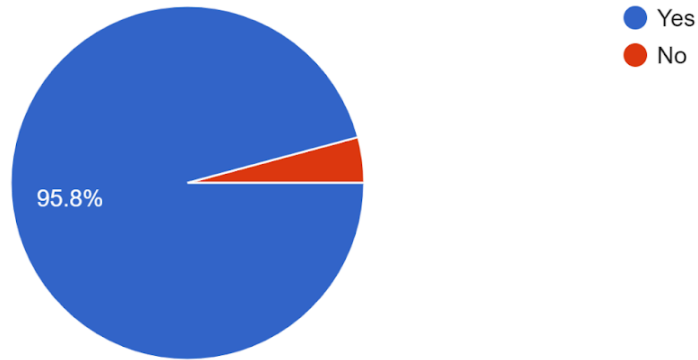

NOTES: All 5 “No” responses were from office spaces or multi-grade shared spaces.

2024 Tools for Schools Survey Results

All food is stored in tightly sealed containers

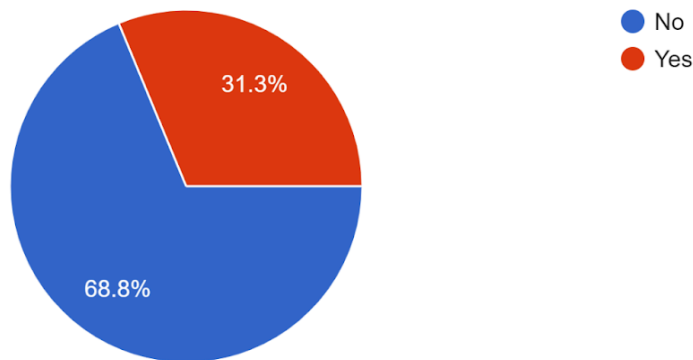

48 responses

NOTES: One of the 2 “No” responses was from a new staff member who has already worked to improve the space. The other no was from a multi-grade classroom.

I have seen evidence of pests or vermin in my space during September 2024

48 responses

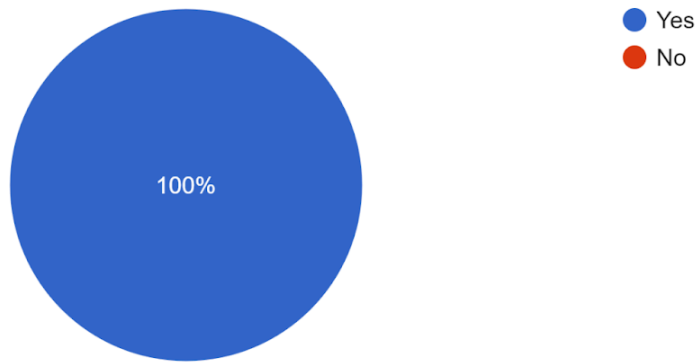

NOTES: The locations of the 15 “Yes” responses vary. 11 were in North School, 4 were in South School. Some of the “Yes” responses were reported as active to “Fix-It” others were not and may have been remnants from the summer. Out of the 15 “Yes” responses 5 respondents put in “Fix Its” for an active issue and at the time of this document being created all 5 were no longer active issues.

2024 Tools for Schools Survey Results

Classroom supplies are stored according to manufacturers' recommendations (i.e. paints, dry erase cleaners)

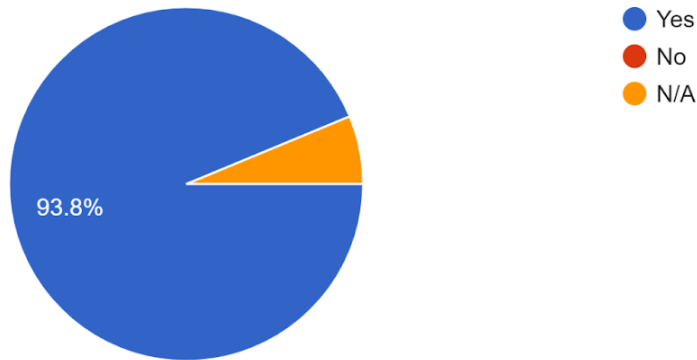

48 responses

NOTES: None.

Exposure to hazardous materials (i.e., used non-hazardous materials and pre-mixed products) is minimized

48 responses

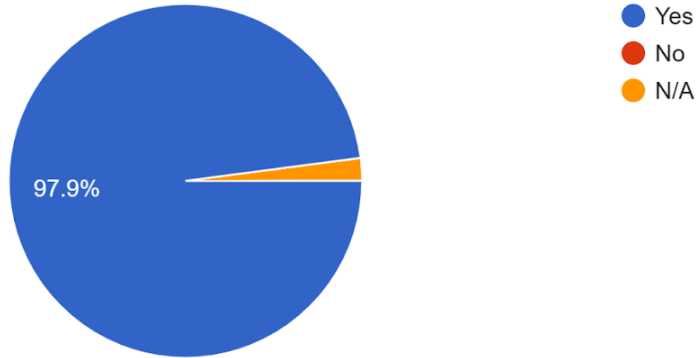

NOTES: None.

2024 Tools for Schools Survey Results

Only school-supplied cleaners are used in my classroom.

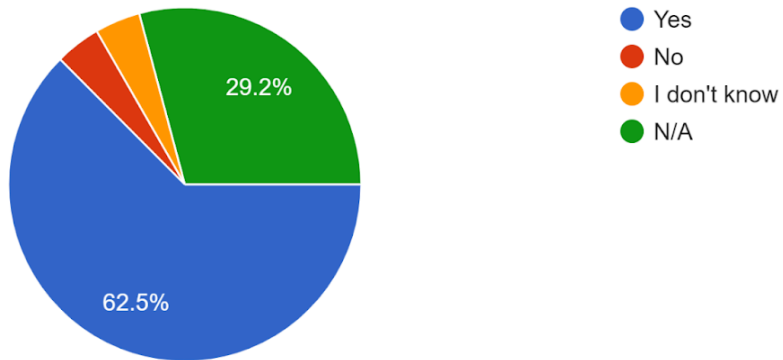

48 responses

NOTES: None.

Are Your Area Rugs Less Than 6 Years Old?

48 responses

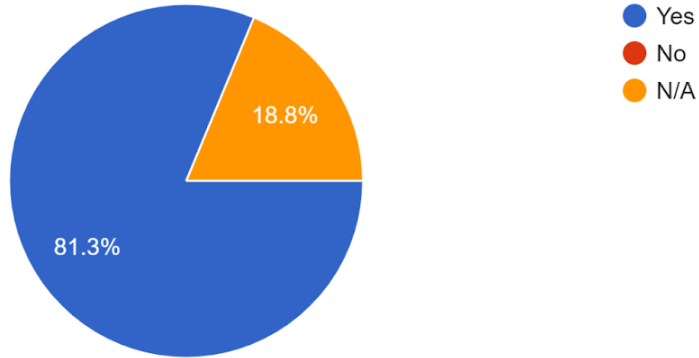

NOTES: The 2 “No” responses came from a 3rd grade classroom and a SPED room.. The 2 “I don’t know” responses came from Kindergarten and 2nd grade. The district purchased all new area rugs following the removal of COVID restrictions. Theoretically if the area rug was purchased by BRS it cannot be more than 6 years old.

2024 Tools for Schools Survey Results

Potential allergies of students are identified and Nursing Staff are consulted as appropriate.

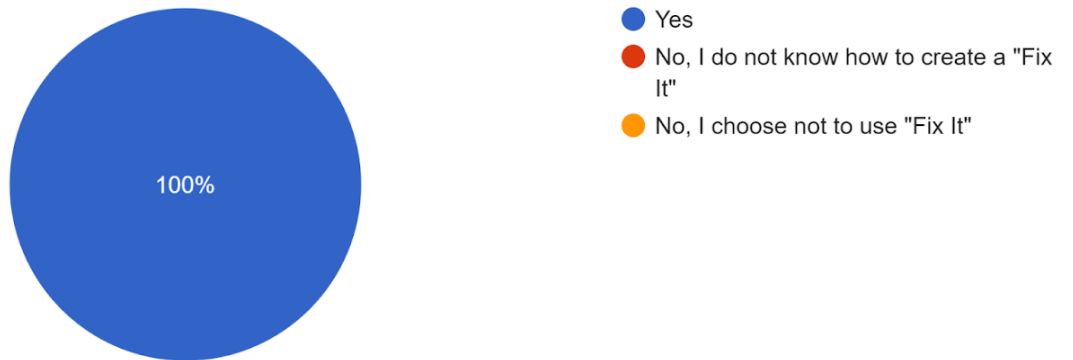

48 responses

NOTES: None.

Do you utilize the "Fix It" work order system to report issues within your space?

48 responses

Notes: None
