

HOW WILL SOMEONE KNOW TO SCAN?

- All products have the universal NFC tap symbol. Some even say, "Tap Here."
- All adjustable bracelets also have a QR code which links to the same profile.
- We are providing weekly education to first responders, the medical community, and the general public.

Still not reassured? Check out our line of **PopIns** - individual buttons that "pop in" to the bracelets. They can be purchased individually for that extra visual cue - or just for fun!

SHARING MADE EASY

OUR PROFILES

We all know the medical alert bracelets that require engraving and a set number of words, right? With Sharewear, you no longer need to worry about these limitations! With our products, you get to create a free digital profile with as much or as little information as you want. Anyone with a smartphone can tap your bracelet, or scan its QR code, to retrieve your information when needed.

UNDERSTANDING OUR PRODUCTS

Sharewear offers a line of innovative products that connect to free digital profiles. These profiles can be accessed by anyone with a smartphone in the case of an emergency! **We cater heavily to our most vulnerable populations**--children, special needs, and the elderly. Our products and their digital profiles provide a voice when it's needed most!

Are they even affordable?

Our products are very affordable! Our wristbands range from \$21-\$30 and require no monthly fees or subscriptions to set up a digital profile.

FREE PROFILES

Each product comes with a free digital profile! No monthly fees!

Free!

WATERPROOF

All products are waterproof and made to withstand the elements!

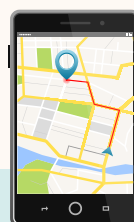

SAFE

Our products utilize NFC technology (think tap-to-pay!) and require smartphones to be within 4cm to access profiles.

GPS?

Our products are not active GPS trackers. However, we offer a subscription-based service that allows you to sign up for notifications that alert you *when and where* your products are tapped.

NO BATTERIES OR CHARGING

You read that right! No batteries or charging ever!

Ready when you need them most!

IPHONE AND ANDROID COMPATIBLE

Our profiles can be accessed by anyone with a smartphone utilizing NFC or by scanning the QR code on the back of the bracelet. No apps or downloads needed by anyone!
