“

Last school year, I attended a transition series for stepping into the next level of age and care for our loved ones with special needs. I found it so helpful for all the different facets that we will be facing into their adulthood. The subjects ranged from legal matters, insurance, day services, and more. The speakers were all professional and now I have a folder full of information to refer back to. I feel that by attending, it gives me more confidence for our future, due to the help from others that we can access.
