

December 20, 2021

Dear Parent or Guardian:

This letter is to remind you that scoliosis screening is required for all students in the 6th and 8th grades who attend public school in Georgia.

Scoliosis is a sideways curve of the [spine](#). About 3% of children are affected by scoliosis. It can occur at any age but is often noticeable between the ages of 9 and 16, when growth occurs rapidly. Early detection is important to avoid potentially serious problems later in life if a spinal curve is not recognized, treated, and it continues to progress. The screening test is an observation of the child's back when standing and bending forward.

There are options for how the screening can be completed:

- Submit a completed Form #4400, Certificate of Scoliosis screening. Form #4400 can be completed by a physician with an active GA license or person working under the supervision of a physician with an active GA license, the local health department, or licensed school nurse. Form #4400 can be found at www.dph.georgia.gov.

OR

- Students can participate in a school scoliosis screening event. Students without a completed Form #4400 on file will be asked to participate in scoliosis screening event at the time it is scheduled.

Parents or guardians can choose to not have their student screened for scoliosis by selecting the opt-out option on Form #4400 or sign the opt-out portion of the school scoliosis screening notification letter.

Thank you for ensuring your child is properly screened for scoliosis.

Sincerely,

Kathleen E. Toomey, M.D., M.P.H.
Commissioner and State Health Officer
