

MENTOR ONE, MENTOR ALL!

About Us

SUMMER THINK CAMP

Eighty20 is dedicated to providing comprehensive STEM and Arts education through our THINK Camps. Since 2012, we've hosted over 50 summer camps across Texas and New Mexico, Juarez, Mexico and California.

Our summer bridge program features STEAM workshops with a focus on VEX Robotics, incorporating project-based learning and daily challenges to engage students.

Our mentorship program pairs high school mentors with younger students, guided by college mentors, fostering inspiration and guidance in STEM fields.

Join us to build and compete with VEX Robotics, culminating in a mini-tournament showcasing student achievements!
