

We're here. For you.

Maybe an emergency room is the first place that comes to mind when someone is injured on the job. But that can mean hours waiting while the doctors take care of life-threatening emergencies. A primary care physician may be able to see you, but not have experience with workplace injuries and treatment plans focused on a faster recovery.

Whether it's a workplace injury or other health care need, Concentra® offers a full range of services at locations close to your place of work:

- Injuries: sprains, broken bones, cuts, back injuries
- Illness: coughs, fever, sinus and ear infections
- Physical therapy
- X-ray and lab services
- Vaccinations
- Substance abuse monitoring

Call your local Concentra medical center today if you need care.
Scan the QR code or find their information on [Concentra.com](https://www.concentra.com).

Walk-ins welcome, no appointments necessary.
