BARTLETT HIGH SCHOOL INNOVATION CAREER PATHWAYS

Advanced Manufacturing

Do you like to work with your hands and create things? Do you want to be a part of something big? Do you want to go right into the workforce?

If so, this pathway might be just what you are looking for.

You will be exposed to the tools, machines, materials, processes, and products used in the modern engineering/manufacturing lab and understand how these concepts are related to a career in engineering and manufacturing.

Seniors will gain invaluable experience engaging in their 100-hour internship with a local company that can assist you when making choices for your future whether it be college, military or right into the workforce. Along with these skills you will be able to earn college credit while in high school along with receiving Industry Recognized Certifications such as OSHA-10 and MACWIC Level 1.

Marketing

Do you like using your creativity to tell a story? Do you like creating content for social media? Do you enjoy communicating and connecting with people? Do you want to go right into the workforce?

If so, this pathway might be just what you are looking for.

Marketing students learn essential communication skills applied to business and career development, entrepreneurship, management, and employability. The curriculum integrates marketing concepts, computer applications, advertising, customer service, product selection & display, merchandising, inventory management, and interpersonal skills.

Seniors will gain invaluable experience engaging in their 100-hour internship with a local company that can assist you when making choices for your future whether it be college, military or right into the workforce. Along with these skills you receive Industry Recognized Certifications such as OSHA-10 and CPR/First Aid.

Healthcare & Social Assistance

Do you have a passion for helping others? An interest in Science? Do you want to challenge yourself and make a difference every day?

If so, this pathway might be just what you are looking for. Due to the high demand for workers in the healthcare industry, these careers are among the most lucrative jobs available.

Topics include, but are not limited to, an overview of the healthcare industry, patient care, anatomy/physiology, body mechanics, and a healthy diet. Students will learn how to operate healthcare equipment and learn about medical supplies. Medical terminology, hygiene, and disease prevention are also topics you will cover.

Students will earn Industry Recognized Certifications such as OSHA-10 and CPR/First Aid and will attend healthcare simulation labs to gain a better perspective of the healthcare field. A 100-hour internship at a medical facility will be available to seniors in the pathway.
