

Publications

The form and content of all school publications shall be the responsibility of the person or persons in charge of any specific publications. That individual(s) shall recognize that all such publications speak for the entire school system and that eventual responsibility legally remains with the Board. This shall include all publications such as annual reports, committee reports, administrative reports, student and teacher handbooks, student newspapers and yearbooks, teacher recruiting pamphlets, guidance brochures, letters to parents and similar school publications.

The publication of clear, concise, interesting and attractive materials from all district sources is encouraged.

A file of all highly significant school publications and clippings from news media will be maintained at each school by the respective principal for the current school year.
