

Journey to College

Tips for creating your FSA ID

Visit <https://studentaid.gov/> to get started.

You will need your:

- ✓ First and last name (must match exactly what is on your SSN card)
- ✓ Date of birth
- ✓ Social Security number (must have an SSN to create an FSA ID)
- ✓ Email address (email address cannot be shared or used for multiple FSA IDs)
- ✓ Physical address
- ✓ Mobile phone number

NOTE: Your session will time out if you aren't active for 5 minutes. Gather all of your information before you start this process.

Step 1

From the Federal Student Aid homepage, click "Create Account" then select the "Get Started" button at the bottom of the webpage.

For helpful tips while creating your FSA ID, click on the question mark (?) after each answer.

Step 2

Enter your name, birth date, and Social Security Number. It's important that your Social Security Number, name, and date of birth match exactly what is on your SSN card.

Step 3

Choose a username and password and enter your email address. It's important to have access to your email address in order to receive the authorization code. Be sure to use an email address you'll have access to for years to come, NOT a school email address. Your email address cannot be associated with another FSA ID so students and parents cannot use the same email address to create their FSA IDs.

Step 4

Enter your permanent address and phone number. It is recommended to set up a mobile phone account recovery. This option is used to help you restore access to your account by sending you a code via text message if you are locked out.

Step 5

Choose your communication preferences to receive required and informational communications related to your federal student aid and student loan process.

Step 6

You will be asked to answer four challenge questions. When answering your challenge questions make sure the answers will be easy to remember and always select the "Show Answer" box to ensure accuracy.

If you do not remember your username and password, you can retrieve your information via your verified email address or by successfully answering your challenge questions. However, this process is not always instantaneous. It is best to choose a username and password that you will easily remember.

Step 7

Your last step will be to review your information for accuracy, accept the FSA ID terms and conditions, and set up multi-factor authentication. A confirmation will be sent to the email address and cell phone number you provided. You can also download an authenticator app which is the most secure option. It's important that you do not close the email verification page during this process. Open another browser to login to your email account to receive your six-digit code to verify your account creation. You will also receive a backup code which you MUST write down or save at this time. This code lets you access your account in the event that you cannot use any other two-step verification method.

Once you have verified your information, you can now log on with your username, password, and verification code (from email, text, or app) to start your FAFSA.

If you are a dependent student, at least one of your parents will need an FSA ID in order to sign your FAFSA. To determine if you're a dependent student for the 2023-2024 FAFSA, visit <https://studentaid.gov/apply-for-aid/fafsa/filling-out>.
