NHS is a program of NASSP

Welcome to the National Honor Society

Dear Parents/Guardians,

Congratulations to your student for becoming a member of the National Honor Society (NHS)! We have been a pioneer in student organizations in the United States by using a unique, forward-thinking lens to recognize outstanding students since 1921, and I'm thrilled to welcome your student to our legacy.

And while we believe in the value and power of recognition, being a member of NHS is far more than academia. Our program is about elevating the culture of an entire community through everyday scholarship, service, leadership, and character—and your student has shown a commitment to these shared values.

Throughout the school year, NHS supports your student through a variety of resources to help them develop leadership, cultivate a love of giving back, and prepare for the next phase in their academic journey and beyond.

As a new member of NHS, your student is encouraged to log on to www.nhs.us/profile and create their very own student profile. Upon doing so, they will be able to have their member status verified by their adviser, earn a digital badge, and receive the most up-to-date information about our programs and activities delivered straight to their inbox. I also encourage both you and your student to follow NHS on Facebook (@NHSandNJHS), Twitter (@nhs_njhs), and Instagram (@nhs_njhs).

Once again, I'm honored to welcome you to the National Honor Society family, and I look forward to building a better school community together.

Sincerely,

Nara Lee
Director, National Honor Societies
