TWO YEARS GONE

Mr. Elmer and Mr. Sam Lawson began their second year as principals with a smile of welcome for everyone. They felt that this would be a great year.

As registration continued and enrollment increased, they strived to find a place for each student where he would benefit the most. Their one aim continued to be to make a better school — a school geared to educate the whole student.

Although the school year went smoothly with only a few days missed because of snow, there was some disappointing news. The principals were informed that the school would not receive calamity days. All the days missed would have to be made up. More disappointing news was that there would be fewer teachers for the 80-81 school year and less money to spend. But the principals still knew that they could help the students face the future.

GRADUATING CLASS OF 1980

As you move to the next stage, create mental pictures of your goal, then work to make those pictures realities.

Exercise your God-given power to choose your own direction and your own destiny. Recognize that the only ceiling life has is the one you give it. You are surrounded by infinite possibilities for growth and achievement.

**Keep your heart young and your expectations high.
Never allow your dreams to die.**

Vickie Lawson, Editor
