Tracey Barnett, FNP

Director of Health Care Services

barnett.tracey@ryeschools.org

To help protect the health of our students, please take the following precautions:

1. **Monitor for Symptoms:** Check your child for any signs of impetigo. If you notice any red sores or blisters, please consult your healthcare provider.
2. **Stay Home if Sick:** If your child is diagnosed with impetigo, they should remain at home until they have been treated and are no longer contagious, typically after 24 hours of antibiotic treatment.
3. **Practice Good Hygiene:** Encourage regular handwashing and remind your child not to share personal items such as towels, clothing, or sports equipment.
4. **Inform Us:** If your child is diagnosed, please let us know so we can monitor the situation and keep other families informed.

For more information about impetigo, you can visit the CDC's website: [CDC - Impetigo](#).

Thank you for your cooperation in keeping our classroom healthy! If you have any questions or concerns, feel free to reach out.
