 - High School Turf Field \$1.1M - \$1.6M

Next Steps

- **Board Adoption of Recommendation**
- **Identify Future Master Plan Phases**
- **Continued Opportunity for Community Feedback**

Lower Dauphin School District - Facility Study

Earlier this year, Lower Dauphin School District contracted with RLPS Architects to conduct a facility study. The goal of the study is to assess the current conditions of all district-owned buildings and to present scenarios to address facility needs. The study will inform the Lower Dauphin School Board as they develop short- and long-term plans to address these needs.

To view the Facility Plan and other related information or to provide input/submit a question related to the study, please scan the QR code below or access the district website at www.LDSD.org. Your input is valued.
