Holiday Issue

Issue 4 • December 2024

DATA THIS DATA THAT DATA SPRAWL!

We touched upon reducing Diman's Data footprint while reconfiguring the Google Shared Drive Structure to better promote collaboration and collegiality within departments in our initial issue. We've also determined that, like all organizations in the information age, Diman needs data!

The next phase of our Google Shared Drive Project:

- Department Heads will be contacted over break regarding information on Shared Drives
- Data orphaned from our previous migration within on-premise storage will be moved to the pertinent Shared Drive
- Data stored on premise will be purged once moved to Google Shared Drives

In need of data or metrics? Please email helpdesk@dimanregional.org for any Data requests you may have. There are several data projects on the horizon, but in the meantime we will address all requests as they are received/time allows and try to get you everything you may need to help our students!
