Put Your Future in Drive With OnRamps

OnRamps provides college credit opportunities through dual enrollment courses designed by faculty at The University of Texas at Austin.

OnRamps fuels your journey, regardless of the destination. Become a lifelong learner and build the skills, strengths, strategies and confidence to thrive in college, career, the military — or wherever your dreams and ambitions lead.

Experience College Before College

The OnRamps mission is to increase the number of students who access and engage in learning experiences aligned with the expectations of leading research institutions.

OnRamps students graduate from high school ready to meet college expectations because they have the opportunity to:

- Experience a real college course
- Build critical study habits
- Develop time management skills
- Earn college credit on a UT Austin transcript

Increasing Access for All

There are no tests or eligibility requirements to enroll in an OnRamps course, other than high school prerequisites.

Fees are kept as low as possible — a fraction of the typical tuition cost at a public university — and include all required labs, books and materials.

Through the Financial Aid for Swift Transfer (FAST) program, 57% of students qualified to take an OnRamps course at zero cost in 2023-2024.

94% of eligible OnRamps students earned college credit*

OnRamps students saved $48 million in tuition and fees*

Prepare for What's Next

After graduation, OnRamps students enroll in college at higher rates than the state average.

*2023-24 academic year

A Different Kind of Course

OnRamps offers 17 courses that cover all the core subject areas and fit graduation plans for specialized pathways and career and technical programs.

When a student enrolls in an OnRamps course, they are concurrently enrolled in a high school course and a college course. Students complete both without leaving their high school campus. College credits accepted through OnRamps appear on an official UT Austin transcript.

The OnRamps Model

High school course taught on campus by OnRamps trained teacher

Online college course graded by UT Austin instructor of record

Two separate grades; the final college grade does not impimpact the high school GPA

Student accepts or declines college credit and grade; declined credit does not impact GPA

Credit Transferability

UT Austin credits earned through OnRamps that fulfill the core curriculum are required to transfer to other public universities in Texas if the grade is C- or above. UT credits also can be transferred to many private or out-of-state institutions.

Our Course Offerings

Contact your campus for information about specific course options, fees and payment methods.

- ☐ Arts & Entertainment Technologies
- ☐ Biology I + Lab
- ☐ Chemistry I + Lab
