Dear Parent(s) / Guardian(s) of {Student Name},

Using federal Title 1 funds and goals, Tewksbury Elementary School has designed a language arts literacy and mathematics support program called ASAP (Academic Support and Achievement Program). The language arts literacy support program will be run by Mrs. Karen Morrow, and the mathematics support program will be run by Ms. Jaime Levy.

Your child is eligible and will receive academic support this year in the area(s) of Math. The support is being offered to students who qualified last year, as well as students who were identified in need of additional support this year as determined by your child's assessment scores on the Aimsweb, a recommendation from your child's previous teacher, marking period standards-based grades, and/or a recommendation from the I&RS team.

This program allows for your child to receive additional support classes in the identified content area(s). The extra support session will create opportunities for small group instruction and support individual student's learning needs. The goal of ASAP is to provide the necessary support to your child, motivate your child to learn, help them understand concepts, and practice skills needed for future learning.

Should you wish for your child **not to participate**, we ask that you click [here](#) to complete the ASAP form.

We look forward to providing this program for your child this year. You will hear from your child's support teacher(s) shortly where they will share your child's ASAP schedule. We thank you for your support in your child's education.
