For

25-018JO PHS and CHS Sub-Varsity Football Field Turf Replacement

Site Visit is scheduled on Wednesday, January 8, 2025 @10:00 am starting at Connally High School located at 13212 North Lamar, Austin, TX 78753. From there you will go to Pflugerville High School.

Due Date Extension- We have extended the due date from Tuesday, January 7, 2025 to Wednesday, January 15, 2025.

There is a \$50,000 Contingency per project.

1. Will the turf graphics stay the same at Pflugerville/ Connally High School?

For graphics, we will have the School Logo, District Logo, School Mascot and use Multiple Colors. The district is interested in viewing many alternates for the graphics on the field. It is the intent that the graphics at both locations will change. Mock ups will need to be reviewed for approval by several departments within PfISD.

2. Please provide original construction documents to give us profile and specification of the existing turf fields at Pflugerville and Connally High School. E-Layer/ Pad installed previously?

Below is a link to a google folder with original and renovation plans for both high school stadiums. We do NOT have a set of plans in the close out documents folder that show specifically converting either stadium to a turf field at either campus. These plans do not confirm that any padding was installed previously.

3. If no pad was previously Installed and a pad is wanted. A portion of the existing rock will need to be removed to account for the pad thickness. Can rock be stockpiled onsite?

Usable space for a rock storage pile is limited. Provide 2 pricing alternates - 1 alternate with a rock storage area available and the 2nd alternate with removing all spoils immediately.

4. Should a Shockpad be added to this project?

It should be added as an alternate in the bids.
