SUBJECT: School Nutrition Program Food Items RFP 23-AGENCY-000106 – Addendum 11

DATE: December 19, 2024

Please note the following revisions to the CNP-STC School Nutrition Program Food Items RFP 23-AGENCY-000106; supporting documentation is enclosed. Price changes effective January 1, 2025.

| Bid Item # | Change   |
|------------|--|
| 106-00045  | ROCHESTER item 357835 Price increase from 80.37 to 86.12.  |
| 106-00313  | KEEBLER item XUS07293 Price increased from 35.43 to 37.16.   |
| 106-01356  | SUNCUP item 090100 Price increase from 24.64 to 28.38.   |
| 106-01358  | SUNCUP item 030301 Price increase from 14.02 to 14.54.   |
| 106-01360  | SUNCUP item 050301 Price increase from 17.61 to 17.89.   |
| 106-01361  | SUNCUP item 090301 Price increase from 15.9 to 16.17.  |
| 106-01362  | SUNCUP item 032000 Price increase from 14.35 to 14.77.   |
| 106-01364  | SUNCUP item 052000 Price increase from 18.03 to 18.39.   |
| 106-01365  | SUNCUP item 030800 Price increase from 14.6 to 15.05.  |
| 106-01366  | SUNCUP item 090800 Price increase from 16.12 to 16.43.   |
| 106-01367  | SUNCUP item 050800 Price increase from 18.27 to 18.51.   |
| 106-01370  | SUNCUP item 030100 Price increase from 22.91 to 27.34.   |
| 106-01371  | SUNCUP item 050100 Price increase from 29.23 to 34.94.   |
| 106-01374  | SUNCUP item 031200 Price increase from 17.53 to 23.68.   |
| 106-01385  | SUNCUP item 412405 Price increase from 12.27 to 12.9.  |
| 106-01388  | SUNCUP item 412800 Price increase from 13.03 to 13.13.   |
| 106-01390  | SUNCUP item 410305 Price increase from 12.28 to 12.91.   |
| 106-01391  | SUNCUP item 410805 Price increase from 12.28 to 12.91.   |
| 106-01392  | SUNCUP item 412505 Price increase from 12.28 to 12.91.   |
| 106-01398  | SUNCUP item 400305 Price increase from 9.84 to 10.25.  |
| 106-01403  | SUNCUP item 402300 Price increase from 9.84 to 10.25.  |
| 106-01405  | SUNCUP item 400505 Price increase from 9.84 to 10.25.  |
| 106-01407  | SUNCUP item 402405 Price increase from 9.84 to 10.25.  |
| 106-01409  | SUNCUP item 400805 Price increase from 9.84 to 10.25.  |
| 106-01411  | SUNCUP item 402600 Price increase from 9.84 to 10.25.  |
| 106-01412  | SUNCUP item 402505 Price increase from 9.84 to 10.25.  |
| 106-01418  | Rice Dream item 22230 was discontinued, suggested replacement is Rice Dream item 22213 / Labatt # 78-0343. Change in pace size from 8/64oz to 6/32oz. Change in price from \$49.26 to \$21.09. |

|                          |   |
|--------------------------|---|
| 106-01596                | PEDIASURE item RL-67523 Price increase from 51.68 to 57.22.                     |
| 106-01598                | PEDIASURE item RL-67403 Price increase from 55.76 to 65.41.                     |
| 106-01971                | International Foods item 471005; change from No Bid to price of \$196.52.       |
| 106-02093 -<br>106-02102 | The items requested come after a student taste test conducted at the Food Show. |

## Market Conditions Report

SunCup™ Juice is committed to producing wholesome quality juice products supported with the highest level of customer service. The information below outlines market conditions, supporting the price increase Gregory Packaging is implementing at this time.

*Please note: the increase is strictly a pass through of the cost increases we are incurring.*

**\*\*ORANGE ALERT\*\*** Frozen Orange Juice Concentrate futures continue to increase at an unprecedented rate. Due to bad weather and a spreading tree disease (citrus greening) for which there is no cure, orange production is way down worldwide. In addition, the increased import prices and the diversion of the orange supply contribute to the increase cost of the available orange supply.

Brazil, responsible for 70% of the world’s orange supply, continues to face a devastating harvest, with 40% of their crop decimated due to the spreading citrus greening disease. The orange crop volume estimate is 7.1% lower than the May 2024 estimate, which is 31.46% lower than the 2023 production levels. Florida, the world’s third-largest orange producer, is still recovering from Hurricane Ian (2022) and suffering more from citrus greening than Brazil. This disease has cut Florida’s orange production 93% over that last 2 decades, according to the International Fruit and Vegetable Juice Association (IFU). All of these factors make orange juice prices that much higher.

In the US- 69% of frozen orange concentrate is imported. A record of the imported orange production is the FCOJ futures contract traded on the InterContinental Exchange. The prices have reached record highs of more than \$5 per solid pound in September 2024 and have increase overed 70% since January. Since the majority of the US frozen orange concentrate supply is imported, the significant increase in FCOJ futures is the primary reason that the CPI for frozen juices has increased. Adding in that in order for the growers to break-even, they are diverting the majority of their orange supply to the more profitable not-from concentrate (NFC).

---

**\*\*PINEAPPLE ALERT\*\*** - Frozen Pineapple Concentrate availability continues to decline and prices continue to rise. Supply chain challenges and distribution inefficiencies have limited the market. Hotter weather, less rainfall, pests, and diseases in growing countries has affected flowering, reduced yields and has also led to smaller fruit sizes and decreased production. The absence of rain in early 2024 has reduced projected volumes by 40%, compared to the 2023 season. Global shipping disruptions has also made it difficult for pineapple to reach global markets

Pineapple processors are navigating a 50% reduction in supply due to the fresh fruit sector absorbing the low-quality fruit typically designated for processing. In addition, the notable shortfall in orange supplies has raised the demand and prices for pineapple.

**Date: February 15, 2024**

**To Our Valued Customers:**

As a leading global food manufacturer, Ferrero U.S.A., Inc. (“Ferrero USA”) is committed to driving category growth through investments in our North American manufacturing infrastructure, delivering superior products, launching innovation, and supporting our base business through quality advertising.

In order to sustain this level of investment, as well as the continued escalating costs within the marketplace, Ferrero USA has found it necessary to implement a price increase across select portions of our Cookie portfolio. Following the national announcement of a few weeks ago, this announcement encompasses items for the Food Service and vending channels.

To assist you with this transition, Ferrero is providing a **135-day lead time**, with new prices effective on **July 1, 2024**. Please see the details below highlighting the items and timing of the price increase.

**Ferrero is announcing the following price changes on select pack types below, on the noted effective date, including but not limited to:**

| <b>CATEGORY</b>        | <b>BRAND</b>                                  | <b>PRICE CHANGE %</b> |
|------------------------|---|-----------------------|
| FOOD SERVICE & VENDING | KEEBLER ANIMAL CRACKERS 1 OZ (150 CT)         | 4.5%                  |
|                        | KEEBLER MINI FUDGE STRIPES 2 OZ (60 CT)       | 4.3%                  |
|                        | KEEBLER BULK - ANIMAL CRACKERS 10/1 LB BAGS   | 6.0%                  |
|                        | KEEBLER BULK COOKIES - CHOCOLATE CHIP (10 LB) | 6.1%                  |
|                        | KEEBLER BULK COOKIES - OATMEAL (10 LB)        | 6.0%                  |
|                        | KEEBLER BULK COOKIES - SUGAR (10 LB)          | 6.0%                  |
|                        | FAMOUS AMOS CLASSIC 2 OZ (60 CT)              | 10.5%                 |

All orders effected by this increase and placed after **June 15, 2024** and/or reflect a customer requested delivery date on or after **July 1, 2024** will be invoiced at the new prices.

Ferrero USA will monitor inventory levels of products subject to the price increase and reserves the right to limit order quantities based upon historical shipment levels. Orders exceeding these levels will be subject to modification. Ferrero USA does not guarantee product availability.

**Seasonal SKUs, Weight Changes, and Other Actions**

The above pricing changes do not include our seasonal portfolio which will be communicated separately during the seasonal sell-in timeframe.

If you have any questions regarding the effective price increase, please contact your Ferrero USA Sales Representative.

Ferrero appreciates your continued support and will remain focused on delivering against the highest quality standards.

Sincerely,

**James Klein**

Chief Customer Officer, Ferrero USA

## Economic News Release

### Consumer Price Index Summary

Transmission of material in this release is embargoed until  
8:30 a.m. (ET) Wednesday, November 13, 2024 USDL-24-2303

Technical information: (202) 691-7000 \* [cpi\\_info@bls.gov](mailto:cpi_info@bls.gov) \* [www.bls.gov/cpi](http://www.bls.gov/cpi)  
Media contact: (202) 691-5902 \* [PressOffice@bls.gov](mailto:PressOffice@bls.gov)

#### CONSUMER PRICE INDEX - OCTOBER 2024

The Consumer Price Index for All Urban Consumers (CPI-U) increased 0.2 percent on a seasonally adjusted basis in October, the same increase as in each of the previous 3 months, the U.S. Bureau of Labor Statistics reported today. Over the last 12 months, the all items index increased 2.6 percent before seasonal adjustment.

The index for shelter rose 0.4 percent in October, accounting for over half of the monthly all items increase. The food index also increased over the month, rising 0.2 percent as the food at home index increased 0.1 percent and the food away from home index rose 0.2 percent. The energy index was unchanged over the month, after declining 1.9 percent in September.

The index for all items less food and energy rose 0.3 percent in October, as it did in August and September. Indexes that increased in October include shelter, used cars and trucks, airline fares, medical care, and recreation. The indexes for apparel, communication, and household furnishings and operations were among those that decreased over the month.

The all items index rose 2.6 percent for the 12 months ending October, after rising 2.4 percent over the 12 months ending September. The all items less food and energy index rose 3.3 percent over the last 12 months. The energy index decreased 4.9 percent for the 12 months ending October. The food index increased 2.1 percent over the last year.

-----  
Changes to physicians' services and outpatient hospital services source data and methodology

Effective with this release, the CPI program will use secondary source medical claims data for the private insurance portion of the physicians' services and outpatient hospital services indexes.

Additional information is available at: [www.bls.gov/cpi/notices/2024/methodology-changes-2024.htm](http://www.bls.gov/cpi/notices/2024/methodology-changes-2024.htm)

#### Food

The food index increased 0.2 percent in October, after rising 0.4 percent in September. The index for food at home rose 0.1 percent over the month. Five of the six major grocery store food group indexes increased in October. The cereals and bakery products index increased 1.0 percent over the month as the bread index advanced 1.9 percent. The index for dairy and related products also increased 1.0 percent in October. The fruits and vegetables index increased 0.4 percent over the month, as did the nonalcoholic beverages index. The index for other food at home increased 0.1 percent in October. The meats, poultry, fish, and eggs index fell 1.2 percent in October as the index for eggs decreased 6.4 percent over the month.

The food away from home index rose 0.2 percent in October, after rising 0.3 percent in both August and September. The index for full service meals also rose 0.2 percent over the month as did the index for limited service meals.

The food at home index rose 1.1 percent over the last 12 months. The index for meats, poultry, fish, and eggs rose 1.9 percent over the last 12 months and the index for nonalcoholic beverages increased 1.7 percent. Over the same period, the fruits and vegetables index rose 0.9 percent and the dairy and related products index increased 1.3 percent. The index for cereals and bakery products increased 0.9 percent over the year and the index for other food at home increased 0.4 percent.

The food away from home index rose 3.8 percent over the last year. The index for limited service meals increased 3.8 percent over the last 12 months and the index for full service meals rose 3.7 percent over the same period.

#### Energy

The energy index was unchanged in October, after declining 1.9 percent in September. The gasoline index decreased 0.9 percent over the month. (Before seasonal adjustment, gasoline prices decreased 1.9 percent in October.) The electricity index increased 1.2 percent over the month and the natural gas index rose 0.3 percent.

The energy index decreased 4.9 percent over the past 12 months. The gasoline index fell 12.2 percent over this 12-month span, and the fuel oil index fell 20.8 percent over that period. In contrast, the index for electricity increased 4.5 percent over the last 12 months and the index for natural gas rose 2.0 percent.

#### All items less food and energy

The index for all items less food and energy rose 0.3 percent in October, as it did in August and September. The shelter index increased 0.4 percent in October. The index for owners' equivalent rent rose 0.4 percent and the index for rent rose 0.3 percent over the month. The lodging away from home index rose 0.4 percent in October, after falling 1.9 percent in September.

The medical care index increased 0.3 percent over the month after increasing 0.4 percent in September. The index for physicians' services increased 0.5 percent in October and the prescription drugs index rose 0.2 percent over the month.

The used cars and trucks index rose 2.7 percent in October, after rising 0.3 percent in the previous month. The index for airline fares rose 3.2 percent over the month and the index for recreation increased 0.4 percent. Other indexes that increased in October include personal care and education.

The index for apparel fell 1.5 percent in October, following a 1.1-percent increase the preceding month. The communication index decreased 0.6 percent over the month, as it did in September. The index for household furnishings and operations and the index for motor vehicle insurance also declined in October. The new vehicles index was unchanged over the month.

The index for all items less food and energy rose 3.3 percent over the past 12 months. The shelter index increased 4.9 percent over the last year, accounting for over 65 percent of the total 12-month increase in the all items less food and energy index. Other indexes with notable increases over the last year include motor vehicle insurance (+14.0 percent), medical care (+3.3 percent), education (+3.8 percent), and personal care (+2.5 percent).

#### Not seasonally adjusted CPI measures

The Consumer Price Index for All Urban Consumers (CPI-U) increased 2.6 percent over the last 12 months to an index level of 315.664 (1982-84=100). For the month, the index increased 0.1 percent prior to seasonal adjustment.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) increased 2.4 percent over the last 12 months to an index level of 309.358 (1982-84=100). For the month, the index increased 0.1 percent prior to seasonal adjustment.

The Chained Consumer Price Index for All Urban Consumers (C-CPI-U) increased 2.4 percent over the last 12 months. For the month, the index increased 0.1 percent on a not seasonally adjusted basis. Please note that the indexes for the past 10 to 12 months are subject to revision.

The Consumer Price Index for November 2024 is scheduled to be released on Wednesday, December 11, 2024, at 8:30 a.m. (ET).

-----  
Consumer Price Index End of Year Supplemental Files and Revised Seasonal Adjustment  
Factors to be Available on February 12, 2025

Each year with the release of CPI data for January, relative importance weights are updated and seasonal adjustment factors are recalculated to reflect price movements from the just-completed calendar year. This routine annual recalculation may result in revisions to seasonally adjusted indexes for the previous 5 years.

Revised seasonal adjustment factors and additional end of year files will be released on February 12, 2025, at 8:30 AM eastern time, in conjunction with the release of CPI data for January 2025. The following files will be available on the CPI supplemental files page, [www.bls.gov/web/cpi.supp.toc.htm](http://www.bls.gov/web/cpi.supp.toc.htm):

- \* Consumer Price Index Seasonal Adjustment Factors (XLSX)
- \* Consumer Price Index Relative Importance (XLSX)
- \* Consumer Price Index Revised Seasonally Adjusted Indexes and Factors (XLSX)
- \* CPI-U Median Price Change and Median Price Change Standard Errors (XLSX)
- \* CPI-U Response Rates (XLSX)
- \* Consumer Price Index Components for Seasonal Aggregation to All items (XLSX)
- \* Consumer Price Index Series Subject to Intervention Analysis Seasonal Adjustment (XLSX)
- \* CPI-U Historical Cost Weights (XLSX)
- \* CPI-W Historical Cost Weights (XLSX)

With the release of these files, the seasonal factors and selected end of year materials will be available in the API and FTP files. These files will be available for all U.S. city average CPI-U data and a subset of U.S. city average CPI-W data.

In preparation for the upcoming end of year supplemental files and revised seasonal adjustment factors, last year's end of year supplemental files and revised seasonal adjustment factors are now available on the CPI supplemental files page.

BLS will also post last year's seasonal factors and other end of year materials in the API and FTP files in mid- to late-November.

For additional information, contact the CPI Information and Analysis section at [cpi\\_info@bls.gov](mailto:cpi_info@bls.gov) or (202) 691-7000.

-----

-----  
Consumer Price Index Publication Changes to be Implemented on February 12, 2025

With the publication of January 2025 data in February 2025, several indexes and average price series will be discontinued, and one index title will change.

The following CPI indexes will continue to be published at the national level, but will be discontinued for all metropolitan areas, census divisions, and regional size classes:

- \* Electricity
- \* Utility (piped) gas (often referred to as natural gas)
- \* Energy services
- \* Fuels and utilities
- \* Household energy

The following CPI average price series will continue to be published at the national level, but will be discontinued for all metropolitan areas, census divisions, and regional size classes:

- \* Electricity per KWH
- \* Utility (piped) gas per therm

The following CPI index will have a title change:

- \* Pet food will be changed to pet food and treats
- 

Technical Note

Brief Explanation of the CPI

The Consumer Price Index (CPI) measures the change in prices paid by consumers for goods and services. The CPI reflects spending patterns for each of two population groups: all urban consumers and urban wage earners and clerical workers. The all urban consumer group represents over 90 percent of the total U.S. population. It is based on the expenditures of almost all residents of urban or metropolitan areas, including professionals, the self-employed, the poor, the unemployed, and retired people, as well as urban wage earners and clerical workers. Not included in the CPI are the spending patterns of people living in rural nonmetropolitan areas, farming families, people in the Armed Forces, and those in institutions, such as prisons and mental hospitals. Consumer inflation for all urban consumers is measured by two indexes, namely, the Consumer Price Index for All Urban Consumers (CPI-U) and the Chained Consumer Price Index for All Urban Consumers (C-CPI-U). The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) is based on the expenditures of households included in the CPI-U definition that meet two requirements: more than one-half of the household's income must come from clerical or wage occupations, and at least one of the household's earners must have been employed for at least 37 weeks during the previous 12 months. The CPI-W population represents approximately 30 percent of the total U.S. population and is a subset of the CPI-U population.

The CPIs are based on prices of food, clothing, shelter, fuels, transportation, doctors' and dentists' services, drugs, and other goods and services that people buy for day-to-day living. Prices are collected each month in 75 urban areas across the country from about 6,000 housing units and approximately 22,000 retail establishments (department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments). All taxes directly associated with the purchase and use of items are included in the index. Prices of fuels and a few other items are obtained

every month in all 75 locations. Prices of most other commodities and services are collected every month in the three largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visit, telephone call, web, or app collection by the Bureau's trained representatives.

In calculating the index, price changes for the various items in each location are aggregated using weights, which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. For the CPI-U and CPI-W, separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 23 selected local areas. Area indexes do not measure differences in the level of prices among cities; they only measure the average change in prices for each area since the base period. For the C-CPI-U, data are issued only at the national level. The CPI-U and CPI-W are considered final when released, but the C-CPI-U is issued in preliminary form and subject to three subsequent quarterly revisions.

The index measures price change from a designed reference date. For most of the CPI-U and the CPI-W, the reference base is 1982-84 equals 100. The reference base for the C-CPI-U is December 1999 equals 100. An increase of 7 percent from the reference base, for example, is shown as 107.000. Alternatively, that relationship can also be expressed as the price of a base period market basket of goods and services rising from \$100 to \$107.

#### Sampling Error in the CPI

The CPI is a statistical estimate that is subject to sampling error because it is based upon a sample of retail prices and not the complete universe of all prices. BLS calculates and publishes estimates of the 1-month, 2-month, 6-month, and 12-month percent change standard errors annually for the CPI-U. These standard error estimates can be used to construct confidence intervals for hypothesis testing. For example, the estimated standard error of the 1-month percent change is 0.03 percent for the U.S. all items CPI. This means that if we repeatedly sample from the universe of all retail prices using the same methodology, and estimate a percentage change for each sample, then 95 percent of these estimates will be within 0.06 percent of the 1-month percentage change based on all retail prices. For example, for a 1-month change of 0.2 percent in the all items CPI-U, we are 95 percent confident that the actual percent change based on all retail prices would fall between 0.14 and 0.26 percent. For the latest data, including information on how to use the estimates of standard error, see [www.bls.gov/cpi/tables/variance-estimates/home.htm](http://www.bls.gov/cpi/tables/variance-estimates/home.htm).

#### Calculating Index Changes

Movements of the indexes from 1 month to another are usually expressed as percent changes rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period, while percent changes are not. The following table shows an example of using index values to calculate percent changes:

|                        | Item A                         | Item B                          | Item C                           |
|------------------------|--------------------------------|---------------------------------|----------------------------------|
| Year I                 | 112.500                        | 225.000                         | 110.000                          |
| Year II                | 121.500                        | 243.000                         | 128.000                          |
| Change in index points | 9.000                          | 18.000                          | 18.000                           |
| Percent change         | $9.0/112.500 \times 100 = 8.0$ | $18.0/225.000 \times 100 = 8.0$ | $18.0/110.000 \times 100 = 16.4$ |

#### Use of Seasonally Adjusted and Unadjusted Data

The Consumer Price Index (CPI) program produces both unadjusted and seasonally adjusted data. Seasonally adjusted data are computed using seasonal factors derived by the X-13ARIMA-SEATS seasonal adjustment method. These factors are updated each February, and the new factors are used to revise the previous 5 years of seasonally adjusted data. The factors are available at [www.bls.gov/cpi/tables/seasonal-adjustment/seasonal-factors-2024.xlsx](http://www.bls.gov/cpi/tables/seasonal-adjustment/seasonal-factors-2024.xlsx). For more information on data revision scheduling, please see the Factsheet on Seasonal Adjustment at [www.bls.gov/cpi/seasonal-adjustment/questions-and-answers.htm](http://www.bls.gov/cpi/seasonal-adjustment/questions-and-answers.htm) and the Timeline of Seasonal Adjustment Methodological Changes at [www.bls.gov/cpi/seasonal-adjustment/timeline-seasonal-adjustment-methodology-changes.htm](http://www.bls.gov/cpi/seasonal-adjustment/timeline-seasonal-adjustment-methodology-changes.htm).

#### How to Use Seasonally Adjusted and Unadjusted Data

For analyzing short-term price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from weather events, production cycles, model changeovers, holidays, and sales. This allows data users to focus on changes that are not typical for the time of year.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data are also used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index before adjustment for seasonal variation. BLS advises against the use of seasonally adjusted data in escalation agreements because seasonally adjusted series are revised annually for five years.

#### Intervention Analysis

The Bureau of Labor Statistics uses intervention analysis seasonal adjustment (IASA) for some CPI series. Sometimes extreme values or sharp movements can distort the underlying seasonal pattern of price change. Intervention analysis seasonal adjustment is a process by which the distortions caused by such unusual events are estimated and removed from the data prior to calculation of seasonal factors. The resulting seasonal factors, which more accurately represent the seasonal pattern, are then applied to the unadjusted data.

For example, this procedure was used for the motor fuel series to offset the effects of the 2009 return to normal pricing after the worldwide economic downturn in 2008. Retaining this outlier data during seasonal factor calculation would distort the computation of the seasonal portion of the time series data for motor fuel, so it was estimated and removed from the data prior to seasonal adjustment. Following that, seasonal factors were calculated based on this "prior adjusted" data. These seasonal factors represent a clearer picture of the seasonal pattern in the data. The last step is for motor fuel seasonal factors to be applied to the unadjusted data.

For the seasonal factors introduced for January 2024, BLS adjusted 46 series using intervention analysis seasonal adjustment, including selected food and beverage items, motor fuels and vehicles.

#### Revision of Seasonally Adjusted Indexes

Seasonally adjusted data, including the U.S. city average all items index levels, are subject to revision for up to 5 years after their original release. Every year, economists in the CPI calculate new seasonal factors for seasonally adjusted series and apply them to the last 5 years of data. Seasonally adjusted indexes beyond the last 5 years of data are considered to be final and not subject to revision. For January 2024, revised seasonal factors and seasonally adjusted indexes for 2019 to 2023 were calculated and published. For series which are directly adjusted using the Census X-13ARIMA-SEATS seasonal adjustment software, the seasonal factors for 2023 will be applied to data for 2024 to produce the seasonally adjusted 2024 indexes. Series which are indirectly seasonally adjusted by summing seasonally adjusted component series have seasonal factors which are derived and are therefore not available in advance.

#### Determining Seasonal Status

Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. Using these criteria, BLS economists determine whether a series should change its status from "not seasonally adjusted" to "seasonally adjusted", or vice versa. If any of the 81 components of the U.S. city average all items index change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used in the aggregation of the dependent series for the last 5 years, but the seasonally adjusted indexes before that period will not be changed. For 2024, 36 of the 81 components of the U.S. city average all items index are not seasonally adjusted.

#### Contact Information

For additional information about the CPI visit [www.bls.gov/cpi](http://www.bls.gov/cpi) or contact the CPI Information and Analysis Section at 202-691-7000 or [cpi\\_info@bls.gov](mailto:cpi_info@bls.gov).

For additional information on seasonal adjustment in the CPI visit [www.bls.gov/cpi/seasonal-adjustment/home.htm](http://www.bls.gov/cpi/seasonal-adjustment/home.htm)

Hi Josh,

Donna ISD is looking to bring in the Chicken and Cheese Tamale from International Food Solutions.

They have pounds allocated but haven't been able to drawdown much.

Would we be able to set this item up for them? Please advise.

Thank you.
