# MAKERSPACE

They are testing student-engineered wind turbines to optimize voltage output by applying the scientific process. This project has them demonstrating expertise in "Human Impact on the Planet", "Wind and Weather", Ratios and Unit Rates, and Area of Irregular Polygons. In addition, they used CAD to design the gears, and CAM to prepare them for 3D printing.

Counselors have officially wrapped up their academic lessons in your students classes. Please connect with your student and reach out to counselors if you have any questions. The end of semester 1 will conclude on December 20th. Students have been encouraged to reach out to their teachers if they have any missing assignments to submit before the deadline. Additionally, students took part in Art Day, which featured the creation of aromatherapy necklaces and canvas painting activities, held at the Wellness Center.

# ESPACIO DE CREACIÓN

Están probando turbinas eólicas diseñadas por estudiantes para optimizar la producción de voltaje mediante la aplicación del proceso científico. Este proyecto les permite demostrar experiencia en "Impacto humano en el planeta", "Viento y clima", proporciones y tasas unitarias y área de polígonos irregulares. Además, utilizaron CAD para diseñar los engranajes y CAM para prepararlos para la impresión 3D.

Los consejeros han concluido oficialmente sus lecciones académicas en las clases de sus estudiantes. Conéctese con su estudiante y comuníquese con los consejeros si tiene alguna pregunta. El final del semestre 1 concluirá el 20 de Diciembre. Se ha alentado a los estudiantes a que se comuniquen con sus maestros si les falta alguna tarea que entregar antes de la fecha límite. Además, los estudiantes participaron en el Día del Arte, que contó con la creación de collares de aromaterapia y actividades de pintura en lienzo, realizado en el Centro de Bienestar.

## BALONCESTO

¡Felicitaciones a los equipos de baloncesto DATA masculino y femenino por ganar contra R.D.V.!
