

COSMETOLOGY

Hybrid Program Outline

Our Cosmetology program teaches you a broad range of beauty skills. While the focus is on hair, the coursework is designed for students who seek to offer a wide variety of services to their clients, including haircuts, coloring, balayage, chemical treatments, skincare, and manicures.

You'll start in the classroom learning the basics. To build confidence, your first haircuts will be on mannequins. Next comes color, chemical processing, skin care, and more. You'll gain valuable experience working with real clients in our campus salons. Finally, we'll help prepare you for your licensing exam and first job as a Cosmetologist. Dream achieved!
