

Class: Algebra I

Teacher: Jacob Cahill

Dates: June 23–August 1 (6 weeks)

Time: 9:00 a.m.–12:00 p.m. (87 hours total)

Course Goal: To provide an equivalent full-year study of first-year Algebra to students wishing to prepare a foundation for advanced high school coursework in mathematics or to preview that material in preparation for the upcoming school year. Students should expect to have their reasoning abilities challenged while they enhance their abilities in the mechanics of the course.

Organization: In the summer curriculum, we use the Pearson Prentice Hall *Algebra 1* text written by Smith, Charles, Dossey and Bittinger as a base. Because the text stresses the mechanics of algebra and does not head off into several different directions, it is highly suitable for a six-week summer course. The class meets three hours daily for the six-week session. The course covers eleven chapters of the text:
