

DIMAN Regional Voc-Tech Construction Update December 2024

Phase 1 building construction is ongoing with steel erection expected through the end of January.

A Beam Signing Ceremony was held on 12/12/24.

Winterization has allowed for floor slab pours, as well as mechanical, plumbing, and electrical work.

Recently Completed Work

- Sequence 2 Steel Erection
- Sequence 1 Work:
 - Roof 2 (of 10) is mostly complete.
 - Concrete Slab Pours
 - Metal Stud Framing / Masonry Walls
 - Building Mechanical and Electrical Systems Main Distribution

What to Expect Next

- Starting January 7th through early February, expect increased activity during working hours at the Locust St. construction entrance. This is a safety requirement, based on the crane's location.
