

Parent Guide: Schoology

Updated: January 2025

Overview:

Schoology is used by Worthington Schools students in grades 6-12. It is an application that provides access to lesson content, assignments, and grades for each of their courses. Students log in to Schoology through [HelloID](#) using their district-assigned username and password.

Parents may create a parent Schoology account, which can be connected to their child's account. Parents log in to Schoology through the [Schoology website](#) and create an account with their personal email, then use the child-specific *Schoology Access Code(s)* to connect to their child(ren).

Creating a Parent Schoology Account:

- If you have already created a Schoology account in the past, it remains active, and your student(s) classes will automatically update from year to year. You do not need to create another account. **Note:** If you have a Schoology account from another district connected to your personal email, you may need to contact your former district and ask them to make your account inactive.
- If you have a Schoology account but have forgotten your password, go to the Schoology [Forgot Password](#) page and enter the email you initially used to set up the account. A link will be sent to your email to reset your password.
- To set up a new parent account, go to the [Schoology Registration Page](#), select parent, and follow the prompts.
- To add additional children to your existing account, log into Schoology and then click the arrow next to your name in the top right corner. Click **Add Child**. Input the Schoology Access code for the child you wish to add, and click the **Use Code** button. Once added, you can toggle between student accounts in the top right corner of the page.

Finding your Schoology Access code:

- Log in to Infinite Campus Parent through the Infinite Campus Parent app or at the [Infinite Campus Parent](#) website.
 - Forgotten parent login credentials can be retrieved at the [Password Recovery Link](#).
- Once logged in to Infinite Campus Parent, click **Parent Access Links** from either the *More* or *Quick Links* section.
- Select **View your Student's various IDs** and click Submit. Student number and Schoology Access code will be displayed for students in grades 6-12.

Schoology provides answers to common questions on this helpful [Parent Information Page](#).
