Caley Makerspace Request for Supplies

We have moved into our new makerspace here at Caley. What is a makerspace? In simple terms, it is an area that allows for creativity and innovation to occur so that students can engage in learning experiences that allow them to make real life connections. For example, within this makerspace our students will have the freedom to design, engineer, fabricate, create, build and collaborate. Makerspaces provide students with a place to tinker and develop something that may not have been possible to create without a space and without resources. This is where you can help. We have a great space, but we need recycled or gently used supplies. Please keep in mind that we are doing our best to avoid containers that have come into contact with allergens.

If you are able to donate any of the below items, we would be so appreciative. For a large item or large quantities, please contact the school at (610) 205-3650 and ask for extension 3668 to coordinate. Thank you for your consideration.

HOME Items

- Cotton Balls
- Tooth Picks
- Paper Plates
- Dixie Cups
- Coffee Filters
- Clothes Pins
- Ziploc Bags – All Sizes
- Buttons
