**AHERA MANAGEMENT PLAN UPDATE
SANTA CRUZ ELEMENTARY SCHOOL
19845 NORTH COSTA DEL SOL BOULEVARD
MARICOPA, ARIZONA**

WT JOB NO. 21-823635-0

1.0 INTRODUCTION

Western Technologies, Inc. (WT) representative Kenna Karjala, EPA-Accredited Inspector, conducted the update site visit for Santa Cruz Elementary School of the Maricopa Unified School District (the District) on October 8, 2024. WT conducted the initial site visit for this school in November 2012, and previous re-inspections in August 2015, March 2018, and August 2021. This re-inspection consisted of driving to the site to determine that no new structures have been installed since the 2021 re-inspection. This document is to be utilized in conjunction with the initial Management Plan as required by the Environmental Protection Agency (EPA), Asbestos Hazard Emergency Response Act (AHERA) 40 CFR Part 763, for this campus.

The District provided a signed acknowledgement from the architect stating that no asbestos containing building materials (ACBMs) were used in the construction of this campus. Aerial photographs from the previous inspection were reviewed by the inspector prior to this re-inspection to confirm that no new structures have been installed on the campus since the 2021 inspection.

2.0 SUMMARY OF BUILDINGS AT THIS CAMPUS

WT observed one building installed at this campus identified as the Main Building. No other structures were observed at this campus, and no changes were observed to the existing structure at this campus during the re-inspection. The Main Building is summarized as follows:

2.1 Main Building

The Main Building at the Santa Cruz Elementary School was constructed in 2007. As indicated by Interstate Interior System's affidavit of non-use of ACBMs dated September 6, 2007, no building materials containing asbestos were used or incorporated during the construction of the building. In the document, the campus was referenced as the Tortosa Elementary School.

3.0 CONCLUSION

This Management Plan is to be maintained by the District and used in conjunction with any other future reports that address asbestos for this campus. The District is required to release a notification of the existence and location of this Management Plan to parents, teacher groups, vendors, and others that may access this campus. A copy of the notification and a written description of the method of distribution shall be included with this Management Plan. Distribution of the notification shall be completed annually hereafter.

The Management Plan must be revised if new structures are installed on this campus or structures are demolished or removed from this campus. As a public document, a copy of this Management Plan must be available at the school's main office for review by anyone upon request and a copy should be maintained by the designated person. It should be noted that other EPA and Occupational Safety and Health Administration (OSHA) regulations covering asbestos, asbestos exposure, and staff training also applies to this campus.

Exterior building materials are not a part of an AHERA inspection. Suspect ACM's must be tested and verified prior to renovation or demolition of a building in compliance with the OSHA and the EPA's National Emission Standards for Hazardous Air Pollutants (NESHAP) regulations as mandated by Pinal County Air Quality. This regulation applies to all public and commercial structures regardless of the age of construction.

The District is also required by AHERA to have a person designated to oversee this Management Plan and all other AHERA duties on behalf of the local education authority (LEA) known as the Maricopa Unified School District No. 20. Acceptance, by indication of signature and date, must be made by the Designated Person and that document must be a part of this Management Plan to complete the requirements of the AHERA regulations (40 CFR Part 763.93 (v) (4)).
