

# Elementary School Counselor

Supporting Early Development and Academic Success

## Supporting Critical Developmental Years

### Developmental Stage

Elementary years are when students develop their academic self-concept, feelings of competence, and attitudes toward school, self, peers, social groups, and family. These years set the foundation for lifelong learning and growth.

### Counselor's Role

We identify and support student needs through early intervention, prevention activities, and collaboration with teachers and families to remove barriers to learning and promote positive development.

### Early Intervention Support

- Early identification of learning barriers
- Educational planning and support
- Grade-level transition support
- Academic progress monitoring

### Classroom Guidance

- Social skills development
- Character education
- Bullying prevention programs
- Personal safety awareness

### Student Support Services

- Individual student support
- Small group counseling sessions
- Crisis response and intervention
- Life skills development support

### Family Partnership

- Parent consultation services
- Academic support strategies
- School-home communication
- Community resource referrals

### Prevention & Support Focus

Our comprehensive program emphasizes early identification and intervention through collaboration with teachers, families, and community resources to support student success in academics, social skills, and emotional development.

Contact your school's counseling office for more information about available services and support programs.
