

Child Nutrition **NEWSLETTER**

YES PREP PUBLIC SCHOOLS
October 2024 / Quarterly

NEW TEAM MEMBER

My name is Georgia Georgacopoulos but many people call me "Gia". I am a Mexican nutritionist who has provided private consulting for nearly 17 years to physically active people and competitive athletes in different sports. I have also worked as a university professor. I have lived in Houston for less than 2 years. I am a fan of sour snacks, flamingos, and Luis Miguel. My hobby is looking for ideas about styling for clothes.

The Child Nutrition Team is excited to introduce the latest gadget designed to assist in tracking our USDA commodities. This tool ensures that expiration dates are clearly visible on the cans. The labels are large and easy to read. Prep-Pal™ features integrated software and a customizable design, making it the perfect solution for our serveries. The streamlined process supports wireless printing, lets us create Food Prep Labels, Grab-N-Go Labels, and even add logos or QR codes.

Child Nutrition is currently utilizing the 18+ building to store food commodities received from the USDA. YES Prep incorporates all these products into their menu items. As the district continues to expand, there is an increasing need for a dedicated space to house Child Nutrition equipment, food, and emergency kits.
