

Introducing

Ed•e

A mobile community connection

Eastern Carver County Schools' Community Education and district Transportation Department have partnered with Carver County Public Health to create **Ed•e**. The repurposed bus will serve as a mobile community connection – bringing educational enrichment, learning opportunities and some health services to Carver County families and residents where they live – right in their own neighborhoods.

A substantial grant from *UCare* made it possible to transform the bus, which was donated by *Positive Connections*, into a mobile learning and meeting place. The renovated bus includes access to broadband internet, smart tv screen, small group meeting space, workspaces and chairs. **Ed•e** is equipped with a wheelchair lift, a generator and HVAC system for year-round use.

For more information, visit the Community Education website at [ce4all.org](http://ce4all.org).

**The refurbished bus offers:**

- Flexible space for learning, meetings and classes
- WiFi access
- Smart TV for presentations
- Wheelchair lift
- Foot-pump sink for hand washing
- HVAC system
- Power generator
- Storage cabinets

**Ed•e connects with our community in a variety of ways:**

- Mobile classroom and meeting space
- Carver County Public Health outreach
- Early Childhood Family Education (ECFE) classes
- Youth and Adult enrichment classes
- Tutoring & after-school homework help

For more information, visit the Community Education website or contact Maddie Lund, Manager of Operations and Facilities.
