Visit to the Eastern Atlantic States Regional Council of Carpenters Training Hall

Cadets visited the Eastern Atlantic States Regional Council of Carpenters Training Hall last month. During the open house event, Cadets joined students from other regional high schools to see what technical training looks like. Cadets saw cabinet building, welding and underwater welding stations, electrical, rigging, CAD/CRC, and millwork demonstrations.

The EASCTC is actively recruiting high school seniors in good standing. For more information, follow this link:
