Greenwich, CT 06830

PUBLIC WATER SYSTEM: Parkway School
141 Lower Cross Road, Greenwich, CT
CLASSIFICATION TYPE: Non Transient Non Community
PWSID: CT0570212

SUBJECT: PER- AND POLYFLUOROALKYL SUBSTANCES (PFAS) MONITORING REQUIREMENTS

Dear Mr. Watson:

The final federal Per- and Polyfluoroalkyl Substances (PFAS) Rule was promulgated on April 26, 2024, and applies to all Community Water Systems (CWS) and Non-Transient Non-Community (NTNC) public water systems (PWS). The PFAS Rule defines the new requirements for CWS and NTNC PWS to conduct initial and ongoing compliance monitoring for the regulated PFAS.

The PFAS Rule specifies that Initial Monitoring must be completed at all entry points to the distribution system before **April 26, 2027**. Groundwater systems serving 10,000 or fewer customers must monitor twice within a 12-month period and samples must be collected 5 to 7 months apart. To reduce costs, systems may use previously collected monitoring data to satisfy some or all of the initial monitoring requirements, if applicable. Starting April 26, 2027, CWS and NTNC must start the ongoing compliance monitoring for PFAS at all entry points to the distribution system**.** Results of the initial monitoring samples will determine the frequency of ongoing compliance monitoring.

To align with the monitoring requirements detailed in the PFAS Rule, Parkway School's water quality monitoring requirements for PFAS at the Well #2 (WSF ID: 53226), Well #3 (WSF ID: 53228), and In-Between Filters (WSF ID: 63057) sampling locations have been ended as of December 31, 2024. However, the Department strongly recommends conducting routine monitoring at the In-Between Filters (WSF ID: 63057) and Entry Point (WSF ID: 00700)

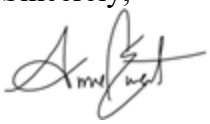

locations to help monitor the efficacy of the existing PFAS treatment. PFAS samples collected at the Entry Point (WSF ID: 00700) can be used to satisfy the initial monitoring requirement, given that they are taken within the required timeframes.

Please review EPA's fact sheet on Monitoring and Reporting requirements for additional information. https://www.epa.gov/system/files/documents/2024-04/pfas-npdwr_fact-sheet_monitoring_4.8.24_0.pdf

Please reach out to the Emerging Contaminants Unit at dph.emergingcontaminants@ct.gov for any questions on the PFAS Rule requirements.

If you have any questions on the water quality monitoring schedule, please contact me at (860) 324-6213 or at anne.ewert@ct.gov.

Sincerely,

Anne Ewert
Environmental Analyst 2

Please note the following:

1. The residual disinfectant concentration must be measured at the same location and time as each total coliform sample.
2. If a Collection Period is specified, all water quality samples must be collected during the specified period.
3. Depending on results, additional monitoring may be required (i.e. repeat or confirmation samples). This schedule is subject to change, and any related correspondence sent by the DWS on or after the generation date of this schedule will have precedence over what is contained in this schedule.

If you have any questions, please contact the Drinking Water Section at (860) 509-7333.
