

ELECTIVES

Electives

**All our *dreams* can
come true, if we have
the *courage to pursue*
them.**

— WALT DISNEY

Elective Courses

**GRADUATION REQUIREMENT:
6 Credits**

Elective courses play a crucial role in Arizona's high school education, offering students the opportunity to explore diverse subjects beyond core requirements. To graduate, students must complete 6 credits of electives, which allows them to tailor their education to personal interests and future aspirations.

Certain courses may not be available on all campuses.
Dual credit courses are subject to community college tuition.

ACADEMIC DECATHLON

Graduation Requirement
ELECTIVE

Prerequisite	ABOR	
TEACHER APPROVAL	NONE	
Fee Semester	Grades	
NONE	ALL	
Semester(s)	Course Credit Semester	Weighted
2	0.5	YES

This comprehensive, multi-disciplinary course is open to students from all academic levels, focusing on a wide range of subjects including fine arts, social studies, mathematics, literature, language, composition, speech, personal interview skills, economics, and a specialized super quiz topic. A select team of nine students from various academic backgrounds will be chosen to represent the school in regional and state competitions. Given the extensive workload and time commitment required, students receive a weighted grade for this course. Students may enroll in this course multiple times for credit.

305****PEER TO PEER SUPPORT****Graduation Requirement**
ELECTIVE

Prerequisite		ABOR
NONE		NONE
Fee Semester		Grades
NONE		ALL
Semester(s)	Course Credit Semester	Weighted
2	0.5	NO

The Peer to Peer Support class offers general education students the opportunity to relate to individuals with diverse needs and gain a deeper understanding of individual differences. Students in this role will provide support to their assigned peers in organization, social skills, and academics during class time. Responsibilities include participating in training, adhering to school and classroom expectations, journaling daily, completing a semester-end project, and attending case conferences throughout the semester. This course also helps students explore careers in the Human Services Career Pathway, preparing them for professions such as teaching, psychology, speech therapy, occupational therapy, and social work.

**SOC
325****PSYCHOLOGY I****Graduation Requirement
ELECTIVE**

Prerequisite		ABOR
NONE		NONE
Fee Semester		Grades
NONE		11,12
Semester(s)	Course Credit Semester	Weighted
1	0.5	NO

This introductory psychology course provides a comprehensive overview of the various schools of thought within the field, exploring the nature of psychology and the intricacies of personality development. Students will engage with foundational concepts and theories that shape our understanding of human behavior and mental processes. Designed for flexibility, this course may be repeated for credit, allowing students to deepen their knowledge and enhance their skills in psychological analysis.

**SOC

Semester(s)	Course Credit Semester	Weighted
1	0.5	NO

Sociology is the exploration of human society and social behavior, focusing on how individuals interact, the groups they belong to, and the social institutions that influence our lives. In this course, students will engage with key sociological theories while examining current social changes and emerging trends that shape contemporary society. Through critical analysis and discussion, students will develop a deeper understanding of the complexities of social dynamics and their implications for individuals and communities.

**SOC
336****SOCIOLOGY II****Graduation Requirement
ELECTIVE**

Prerequisite		ABOR
NONE		NONE
Fee Semester		Grades
NONE		11,12
Semester(s)	Course Credit Semester	Weighted
1	0.5	NO

This course is designed for students who have already completed an introductory sociology class, aiming to prepare them for global citizenship through an in-depth exploration of contemporary issues. The curriculum covers a broad range of topics, beginning with the history of sociology and progressing to current social challenges, including inequalities, stratification, and social movements, while also delving into social psychology to understand individual perspectives within societal contexts. The course concludes by examining career opportunities in sociology, providing students with a practical understanding of how their sociological knowledge can be applied in the modern workforce.

ELECTIVE**

Prerequisite		ABOR
NONE		NONE
Fee Semester		Grades
NONE		11,12
Semester(s)	Course Credit Semester	Weighted
1	0.5	NO

This course offers students an immersive exploration of civil and criminal law through true-to-life encounters with fundamental legal processes. Employing innovative teaching methods, including simulations and role-playing exercises, students will dramatize landmark cases, providing a hands-on understanding of the intricacies of the legal system. The course is specifically designed to prepare students for Mock Trial competitions, offering valuable practical experience in legal argumentation and courtroom procedures, and may be repeated for additional credit to further enhance skills and knowledge.

Standards-Based Grading

Opening a New Realm of Possibilities

Yuma Union High School District rolled out standards-based grading, a new, innovative system of grading that is expected to increase student proficiency, knowledge, and best prepare them for the future.

Standards-based grading, or SBG, is a system of assessing students based on the mastery of specific content and skill goals within a course. The goals are laid out as standards within each course and students are then measured on their ability to meet the standard using a well-defined rubric that details the necessary criteria.

"Teachers and students will engage in a process of reteach and reassess to ensure ALL students master the essential content standards," YUHSD Executive Director of Teaching and Learning Corey Semler said.

Overall, SBG assesses students' skills and knowledge in relation to the specific Arizona State Standards for that particular grade level and content area.

SBG seeks to make learning more apparent by showing a student's level of understanding for each individual standard. This targeted approach to learning provides teachers with actionable data enabling them to provide specific and timely feedback promoting student growth.

"Instead of seeing individual assignments in the gradebook, you will see each standard in the summative category broken down into specific student learning objectives," Semler added. "Each specific learning objective will be graded on a scale of 0-4, with scores of 1-4 considered 'passing.' As students continue to work on the learning objectives and standards throughout the year, their scores will be updated to reflect their most recent level of understanding. These scores will not be averaged, so students' scores will fully reflect their improvement rather than punishing them for beginning with a low score."

IN EFFECT, THE PROCESS WORKS AS FOLLOWS:

Teachers will emphasize the most recent evidence as a means to assess and report a student's level of proficiency.

Students will be assigned practice as a means of formative feedback.

Student mastery will be assessed through the use of a consistent and well-defined proficiency rubric.

Students will be assigned a zero only as a result of insufficient evidence of learning.

UPDATED 4.0 CONVERSIONS SCALE
