

Today, ISAAC Middle School received notice from PowerSchool that some information may have been compromised in a potential breach of the PowerSchool Student Information System. The security breach was nationwide and was not isolated to our school. On today's call with PowerSchool, it was reported that the FBI was involved in solving this incident so that the information obtained in the breach was contained and has been deleted. PowerSchool reports that the data has been deleted and that no additional copies exist.

We are committed to ensuring the safety and security of our school physically and virtually. In addition, our ISAAC staff immediately went into action as soon as it was notified about the breach. Moreover, we are sharing this information about the security breach in compliance with Connecticut State Statute Sec. 10-234dd. *Duties re: unauthorized release, disclosure or acquisition of student data.*

Please know that as more information comes our way, we will share it immediately with you. PowerSchool has stated that they are still actively investigating the causes and extent of the breach and has promised to share updates specific to individual school in the future. As soon as we learn about these updates, we will share them with you.

Please see the link from PowerSchool that explains more about the incident and any updates from them.
