If you think there's a need for playground equipment improvement, describe the need.

- None
- Need more handicapped accessible entrances and equipment
- more dedicated to preschool
- The old playground equipment is outdated. You can't get parts for it anymore.
- Improve to grade appropriate equipment and ground padding
- N/A
- Remove gravel and possibly relocate the West playground to expand the parking lot area
- Not sure
- Not sure
- yes more swings and slides
- I'm not sure they need more.
- Need to make sure that there is plenty of ADA compliant equipment
- Not sure of this need
- The old playground equipment needs to be replaced and the rocks need to be removed.
- The rocks need removed from the West side playground. I believe the equipment on that playground is originally from Northview, and is well over 15+ years old.
- update and more
- n/a
- The playground equipment was improvement a few short years ago. I think there are greater needs at the moment since the equipment is not old.
- NA
- More equipment.
- I don't think there is a need.
- NA
- N/A
- Na
- Replace the southeast playground.
- Our old playground could be replaced

- Would need testimonials from people in the building. Normal replacement of degradable surfaces would be expected.
- Fencing around both playgrounds.
- None

What other items do you think are needed in a construction project?

- None
- New laminator
- Parking?
- As the baker for Westview cafeteria i can tell you the kitchen for Westview needs updated and expanded. We are working with outdated equipment and limited equipment. There is no space for anything. I cook for at least 350 servings (students) and we battle for space to keep things warm and space to serve. If we are giving option to add classrooms for the prek and such we need to Please keep in mind the kitchen. I feel we are working at max capacity for what we have.
- Kitchen needs to be remodeled.
- Packing expansion to the west,, main road access from the west (improving congestion on 6th street - bus access only)
- None
- A PK "wing" addition and parking lot renovation on the east side of the building
- Not sure
- NA
- Replace tile flooring throughout the building
- Additional spaces for related services like OT, sensory room, SPED rooms, speech rooms, areas to do conferences, spaces for counseling both school counselors and outside providers.
- Update the exterior to a more modern look rather than the current 1970s look
- I believe Westview is in need of more space throughout the building.
- I feel that adding more classroom room space, updating the existing classrooms, and updating the old playground are the main concerns.
- If PK is staying at Westview I have always thought that it would be smart to add the extra classrooms at the end of the hallways - creating a full square for the entire building. Additional restrooms could be added in the middle of the hallway for staff and students. The playground could also be inside the square, eliminating safety concerns, especially the possibility for students to run off property.
- extend parking lots

- To offer more informed suggestions, additional context for each of these would have been helpful. For example, understanding the age and current condition of the school roof would be helpful in prioritizing between roof replacement and classroom additions.
- I think that you have included a wide variety of suggestions / ideas to be included in the projection. Thank you!
- NA
- N/A
- None
- NA
- N/A
- Bus barn
- Not sure
- We need more classroom space for specials and intervention.
- "No opinion here.
- Would need a report of enrollment and testimonials from people in the building."
- The addition of at least one large sensory room for all students to utilize (OT and PT could also use this space to provide services), in addition to sensory rooms attached to the self contained special education classrooms.
- It appears many of the items listed above should be or should have been routine maintenance items, not capital improvements. Why would renovating bleachers that don't get used but for a few times a year even be a project consideration? Seems like a "wish list" item.
