Essential
Skills in
each Unit

Unit 1

Interaction

Frank Lloyd Wright

- How do Earth's major systems interact? How do the properties and movements of water shape Earth's surface and affect its systems? (Earth Science)
- What underlying forces explain the variety of interactions observed in our solar system? (Space Science)
- How do human interactions help and harm our planet? (Earth Science)
- How do the interactions among people, groups and cultures impact migration, trade and culture? (Social Studies/Geography)
- How did the interactions between Explorers and Native Americans contribute to major historical events in the United States? (Social Studies/History)

Unit 2

Change

Cindy Sherman

- How did the development of political, social, and economic institutions in the British American Colonies cause change? (Social Studies/History)
- How do substances combine or change (react) to make new substances? (Chemical Science)
- What changes occur in seeds/plants and their environments throughout the plant life cycle? (Life Science)
- How do we measure and observe changes in weather and climate? (Earth Science)
- What political, social, economic, and military developments lead to and occurred during the American Revolution? (Social Studies/History)
