Health Science and Medical Technology Pathway @ Lathrop High School

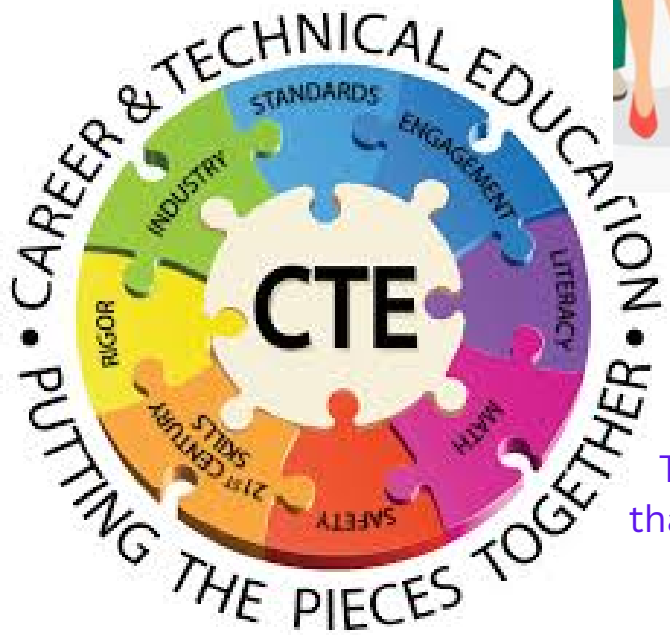

Introduction to Health Science (Prerequisite)

Intermediate Health Science

Advanced Health Careers Program-

Manteca Unified School District is committed to comprehensive articulation of instructional programs between secondary and post-secondary institutions, usually referred to as "2+2" articulation. The "2+2" articulation links the high school and CTE programs with the post-secondary institution. These articulation programs lead to an Associate Degree or program specific certificates. This articulation process is a system designed to help students to advance from one course, program, or educational level to the next without unnecessary repetition of essentially similar courses for which credit has been received. Students who have completed articulated courses in high school may receive college credit.

The State offers more than 10,000 CTE courses that meet a-g requirements necessary for entrance into the UC college system
