

# Independent Studies in Technology Applications

## Pathway 1: Networks & Cybersecurity

Learn how the information travels from one device to another, and how to keep that information safe. Earn certifications in networks, cybersecurity, and ethical hacking.

*This is a certification/hands-on class.*

## Pathway 2: Python and Artificial Intelligence

Learn and get certified on how to create programs using Python, and then use this knowledge to create AI agents using API keys from OpenAI, Anthropic, Google, and more. *This is a certification/hands-on class.*
