New Year's Resolution View Point

By: Khloe Kilmon, Caleb Kunkel, Emma Martin, Wyatt Gose.

The School's New Year's Resolution

We asked students and teachers about their New Year's resolution. We found the top three answers and would like to share them with you.

Coming in third is video games and other online social media activities.

In second place is improving in grades and other school activities.

Finally, in first place, taking time to exercise and getting fit was the most popular answer among students and teachers.

Those are the three most popular New Year's resolutions among our school.

Why New Year's Resolutions Are Important

We asked people what their New Year's Resolution was and the majority said that they didn't know. Some people didn't take it seriously and said silly answers.

New Year's Resolutions are important because they can help you achieve your goals.

It is also scientifically proven people who write New Year's Resolutions are TEN times more likely to reach their goal than the ones who didn't.

Remember, it is never too late to write your New Year's Resolutions.

8th Grade art has been doing an art project known as agamograph. When you walk to see it from a different perspectives, the pictures change to show a different image.

This is by Madi D. in P3 who made Snoopy & Woodstock

Weather

Maddox Stephens, Elliot Boller, and Noah Jordan

Introduction

Good afternoon everyone! We have switched to the weather program, as you might have remembered us from the comic strip, Flynn The Bear. But we have moved on and now we are doing the weather. We are very excited to show you the weather forecasts, major weather around the world, and beyond. Beginning with the weather, how do we have no snow yet?! It is the beginning of January and we should have a foot of snow, but we have nothing! You can't say the same for Thompson's Pass though, as they currently have 2 feet of snow. This has been a wild ride, and we are very excited to ride it with all of you.

Weekend Weather

Starting off with the wind speeds last weekend, January 11 and 12, the speeds fluctuated between 17 and 14 miles per hour. This weekend will also contain lots of rain, and will be around 40 degrees Fahrenheit in the mornings! Right before the weekend, of course, is a Friday. This Friday will be different, with an 85% chance of snow. This will cause ice during the weekend. Adding on to this ice, will, yes, be more snow on Monday. Continuing this week, the sun will come out! The temperature will continue to rise, but will only stay at 20-25 degrees Fahrenheit. The weekend following will continue to be cloudy, with a 24% chance of snow. This is Maddox, Noah, and Elliot signing out!
