

Welcome to our 2024 Winter Program!

The mission of the Brinnon School District is to provide students with an exemplary education that prepares them for college/trades, career, and life. It is our goal to provide a school our community can be proud of where students make exceptional academic progress. We work to create a caring and supportive environment where every child is important.

The facilities improvements that have been made to our school over the summer are spectacular! A \$3 million Small Rural Schools and a \$200,000 Healthy Kids, Healthy Schools grant funded 100% of the projects:

- New roof
- More exterior siding and insulation
- Flooring in the main building
- Electrical system upgrades
- Generators that will come on automatically when the power goes out
- Regulation sized basketball court with benches
- Large central piece of playground equipment (the piece it replaced needed extensive repairs)

Get ready for summer 2025! With facilities projects complete, we will plan a fun summer program for our students. We will send out details later in the spring.

We appreciate the ongoing support of our amazing community. Coats, school supplies shoes and other materials are provided by generous individuals and organizations.

We wish you a very happy holiday season.

Thanks to Mrs. Kaye for the delicious cookies
